1. Notification

As required by the State of Oklahoma, Nokia is providing notice that, as of November 12, 2009, it will have a compliant Recovery Plan for certain Nokia products that are to be sold in Oklahoma.

2. Recovery Plan

A. Covered Nokia Computer Equipment

Nokia is implementing the following Recovery Plan in connection with the anticipated sale of its new Booklet 3G (a small wireless netbook device). The Nokia Recovery Plan (NRP) applies exclusively to covered electronic devices that have been:

- **labeled with Nokia's brand(s), both those in use and no longer in use; and**
- **purchased by an individual primarily for personal or home business use.**

The NRP will provide for the collection of all covered devices, as defined by the Oklahoma Computer Equipment Recovery Act, that are manufactured by Nokia. The NRP will provide for Nokia's collection of any covered electronic device labeled with Nokia's brand from a consumer that has reached the end of its useful life. The Nokia device that is subject to these regulations is called the Booklet 3G.

B. Elements of the NRP

The NRP consists of a mail back system designed to be free of charge and easily accessible to the consumer. The NRP is built upon Nokia's existing cell phone recycling program. Nokia has engaged voluntarily in the collection and responsible recycling of cell phones in the USA for over 6 years. Currently we operate over 5000 collection points in 85 countries around the world.

November 6, 2009

Key features of the NRP include:

- Consumers do not have to pay a separate fee at the time of recycling to recycle used computer equipment under Nokia's NRP.
- Nokia provides for the collection from a consumer of any used computer equipment that bears the Nokia brand.
- Nokia provides for the proper recycling or reuse of used computer equipment.
- Nokia provides for the collection of Nokia computer equipment that is reasonably convenient and available to consumers in Oklahoma, and designed to meet the collection needs of consumers in the state.
- Consumers can find out specifically how and where to return computer equipment at http://www.nokiausa.com/recycle.

C. Nokia's Convenient Collection System and Recycling Events

The primary system of collection employed in Oklahoma and across the USA is a web-based mail back system that allows the consumer to print a prepaid postage label which may be applied to a container for easy, cost-free shipment of the device to Nokia's recycling partner.

Additionally, Nokia plans recycling events often in partnership with museums in Oklahoma and across the USA as part of an educational film sponsorship. The film is called Wild Ocean and information regarding collection events associated with this program is located at http://www.wildoceanfilm.com/#/About/SponsorsAndPartners/. As part of this program consumers are encouraged to text the word "Ocean" to the number 334455 to receive information on recycling their retired devices.

D. Consumer Information

The NRP is designed to meet the needs of the consumer and to provide information on how and where to return used equipment for recycling. Information will be available to consumers on how to recycle Nokia's computer equipment at the following Nokia web site: http://www.nokiausa.com/recycle. We have attempted to expand the visibility and ease of access to this address by listing the site with other recycling organizations and websites such as EBay's Rethink http://pages.ebay.com/rethink/ and Greenplanetsearch.com http://www.greenplanetsearch.com as well as others.

In addition to the NRP link for recycling provided above, Nokia also publishes environmental information on all of our products in the form of an eco-declaration. Eco-declarations for our products are located at http://www.nokia.com/environment/we-create/devices-and-accessories/eco-declarations. The eco-declarations include information on Recycling and Disassembly, instructions to the user on how and where to recycle the device, and environmental information relative to Substances and Materials and Energy Consumption for each product.

Finally, Nokia will not dispose of covered devices in landfills or transfer covered devices to computer equipment recycling facilities that dispose of covered devices in landfills other than necessary incidental disposal in de minimis amounts.

If you have questions or need additional information on our Recovery Plan, please contact David Conrad at david.conrad@nokia.com and at 214-558-6732.

Nokia is committed to the environment
Rethink what happens to your old Nokia device.

Don't throw it in the trash. Be gentle on the environment and let Nokia recycle it in a way that conserves our natural resources at no charge to you. Recycle your old Nokia Device today.
