- (1) Annual arithmetic mean
- (2) Not to be exceeded more than once per year
- (3) The standard is attained when the expected arithmetic mean concentration is equal to or less than the numerical standard as determined by 40 CFR 50, Appendix K.
- (4) The standard is attained when the expected number of days per calendar year with maximum hourly average concentrations above 0.12 ppm is equal to or less than 1, as determined by 40 CFR 50, Appendix H.
- (5) Maximum arithmetic mean averaged over a calendar quarter
- (6) The standard is attained when the computed 3-year average of the annual 4th-highest daily maximum 8-hour average does not exceed 0.08 ppm.
- (7) The standard is attained when the 98th percentile concentration is equal to or less than the numerical standard as determined by 40 CFR 50, Appendix N.
- (8) The standard is attained when the Annual arithmetic mean is equal to or less than the numerical standard as determined by 40 CFR 50, Appendix N.
