

Subject: Samsung E-Waste Compliance Plan

Dear Mr. Stickney,

Greetings:

Samsung will initiate an ewaste program on January 1, 2009. The program consists of an online mail-back program in which consumers can log onto www.samsung.ecotakeback.com and print out a mailing label based upon their zip code. The consumer can then box the unit and take to a convenient location for drop off; convenient locations will be provided to the consumer based upon their zip code.

Samsung will pick up the cost for delivery and will responsibly recycle the material through Eco International.

Thank you very much, and please let me know if you have any questions.

Sincerely,

Michael Moss
