Computer Equipment Recovery Plan for DRS Tactical Systems for the State of Oklahoma

1. The manufacturer must adopt and implement a recovery plan, either alone or in cooperation with other manufacturers. DRS will be adopting their own recovery plan.
2. The recovery plan must fully explain how the manufacturer will collect from a consumer and recover each covered device that is labeled with the manufacturer's brand, at no charge to the consumer. Customers may request a Return Material Authorization (RMA) number by contacting DRS directly at 1.321.727.3672, extension 3076. Customer's will then pack the unit and ship the unit prepaid and Insured to the address listed on the DRS website.
3. The recovery plan must provide for covered device collection services that are reasonably convenient and available.
4. The recovery plan must be designed to meet the collection needs of consumers in this state.
5. If the manufacturer does not offer a mail-back system, it must submit for approval by the Department of Environmental Quality a plan that offers reasonably convenient collections.
6. The recovery plan must include a statement that the manufacturer will not dispose of covered devices in landfills or transfer covered devices to computer equipment recycling facilities that dispose of covered devices in landfills other than necessary incidental disposal in de minimis amounts. Computers returned to the DRS facility will be processed for recycling in compliance with all local, state and federal disposal laws.
7. If a manufacturer operates or publishes a website for providing product information about a covered device they must include information about collection and recovery for consumers on their website. Also must include a link to it in the recovery plan. Link to recovery plan;
