Mycoland RV & Mobile Home Park Water Use Advisory

The Oklahoma Department of Environmental Quality (DEQ) has advised Mycoland RV & Mobile Home Park in Osage County to inform users of its drinking water to use bottled water or another acceptable source due to the presence of *E. coli*.

Due to high levels of nitrates in the water provided by this particular system, boiling the water is *NOT* recommended, **making this different from a typical boil advisory**. Boiling water with elevated nitrate levels may further increase the nitrate levels.

Until this matter has been resolved, consumers should use bottled water or another acceptable source for consumption, food preparation, washing dishes and brushing teeth.

Federal law requires that consumers be notified when a public water supply exceeds certain maximum contaminant levels and might be harmful to the health of consumers.
