

“Economic and Environmental Benefits of Alternative Energy in Oklahoma” Project

EPA Region 6 has awarded a special project grant to the Oklahoma Department of Environmental Quality in partnership with the Oklahoma Department of Commerce State Energy Office. The project, titled “Economic and Environmental Benefits of Alternative Energy in Oklahoma,” is designed to establish an additional GIS layer of alternative

energy resources for the state of Oklahoma on the current GIS map at the Department of Commerce website. Additionally, educational outreach materials will be developed to inform the public of the economic and environmental benefits and impacts of alternative fuel production and usage.

For questions about the project, please feel free to contact either of the following individuals:

Oklahoma Department of Commerce State Energy Office

Carolyn Sullivan (405)815-5347

Oklahoma Department of Environmental Quality

Tracy Rudisill (405)702-4167
