

# APPENDIX I

## BOX-WHISKER PLOTS SPINUP OF SELECTED 75% LOAD ALLOCATION SCENARIO

Lake Wide Summary Statistics Based  
On Averages of 8 Station Locations

Annual: April 18, 2008 - April 27, 2009

Seasonal (Stratified): May 15, 2008 - Oct 1, 2008

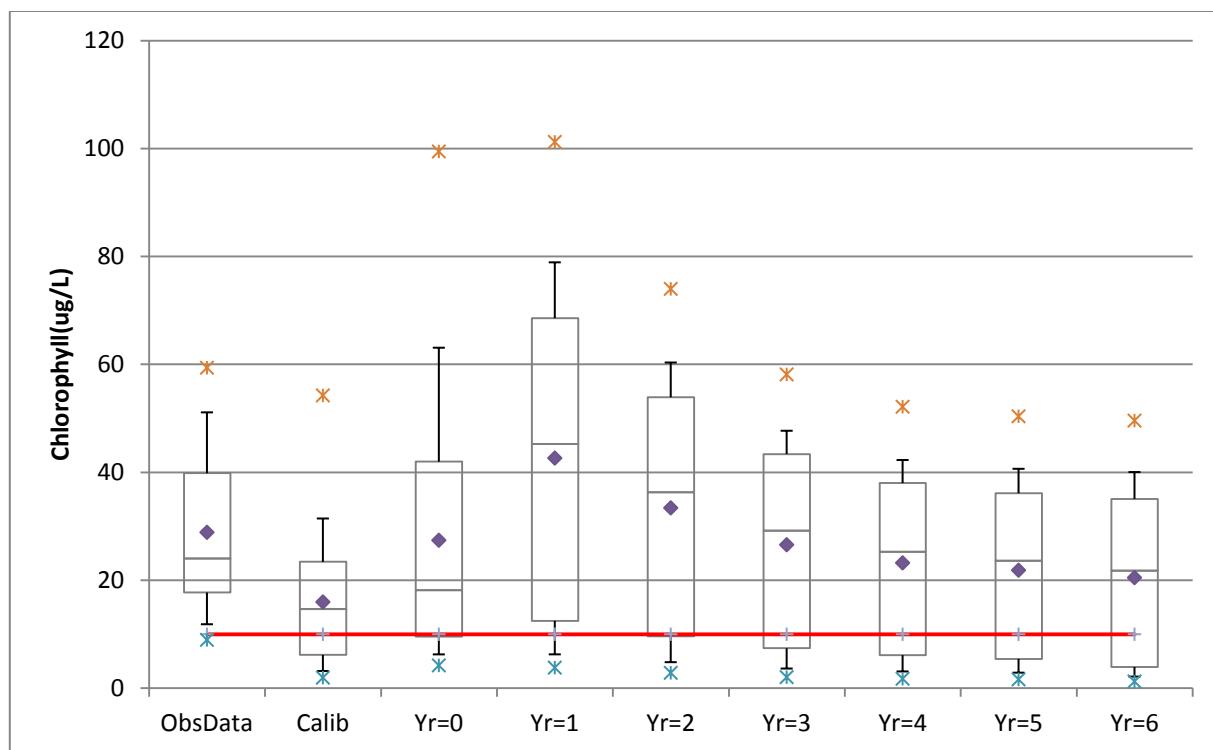

Figure 1. Annual surface chlorophyll-a for spinup of 75% reduction run.

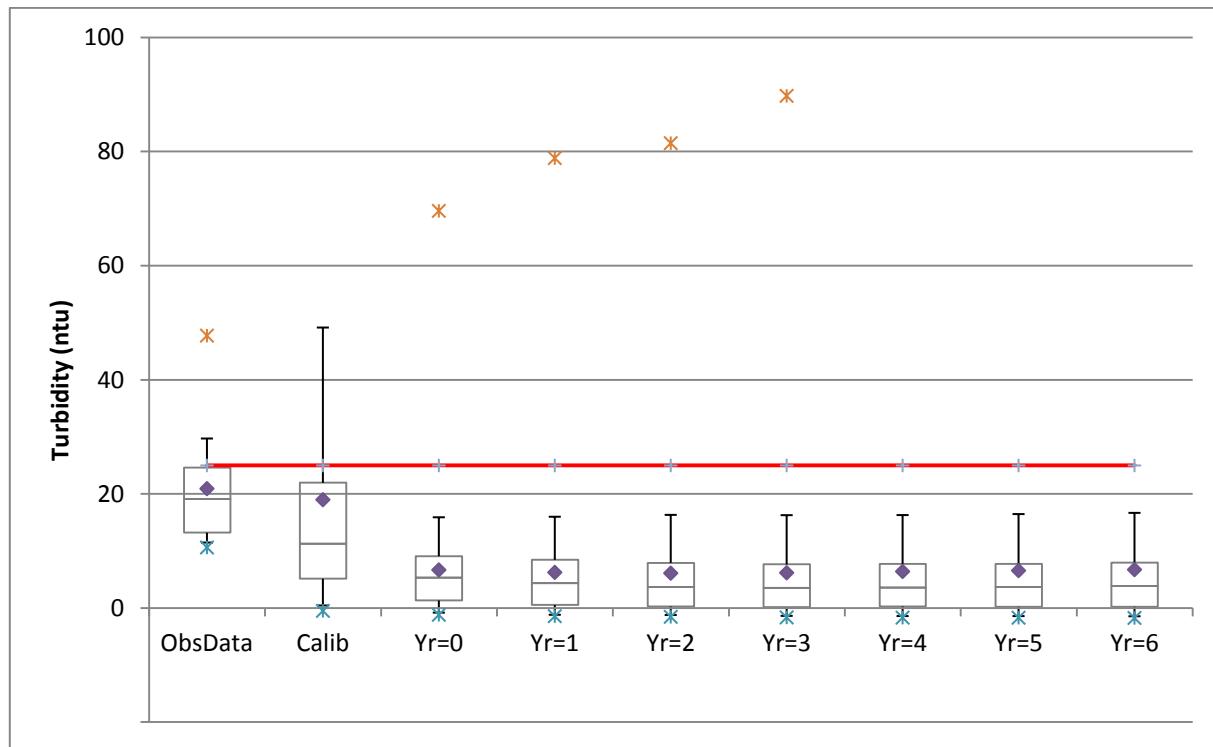

Figure 2. Annual surface turbidity for spinup of 75% reduction run

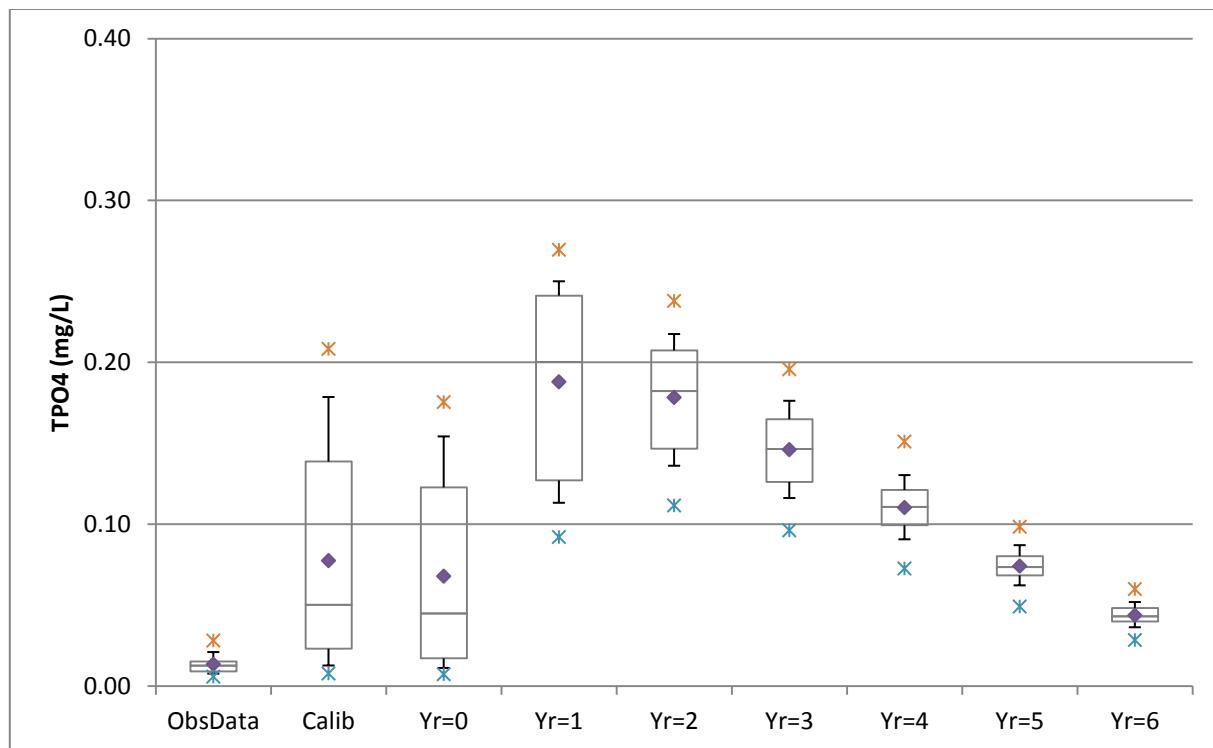

Figure 3. Seasonal surface TPO4 for spinup of 75% reduction run

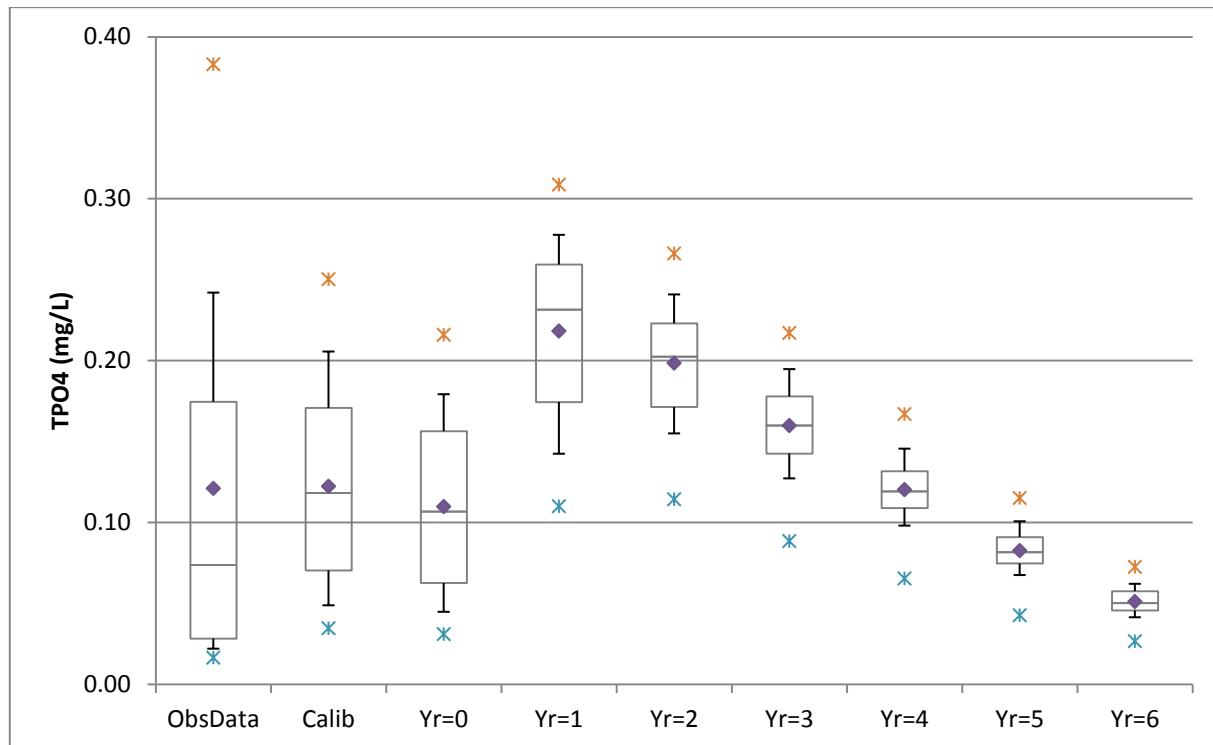

Figure 4. Seasonal bottom TPO4 for spinup of 75% reduction run

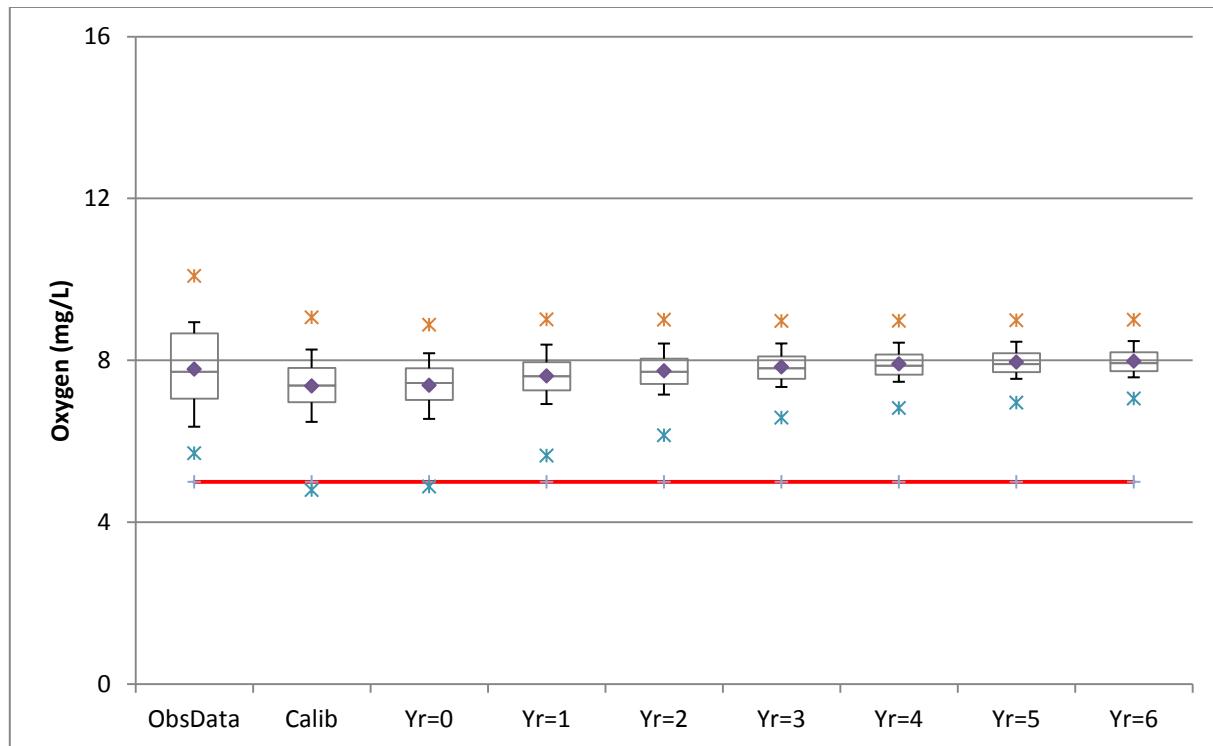

Figure 5. Seasonal surface DO for spinup of 75% reduction run

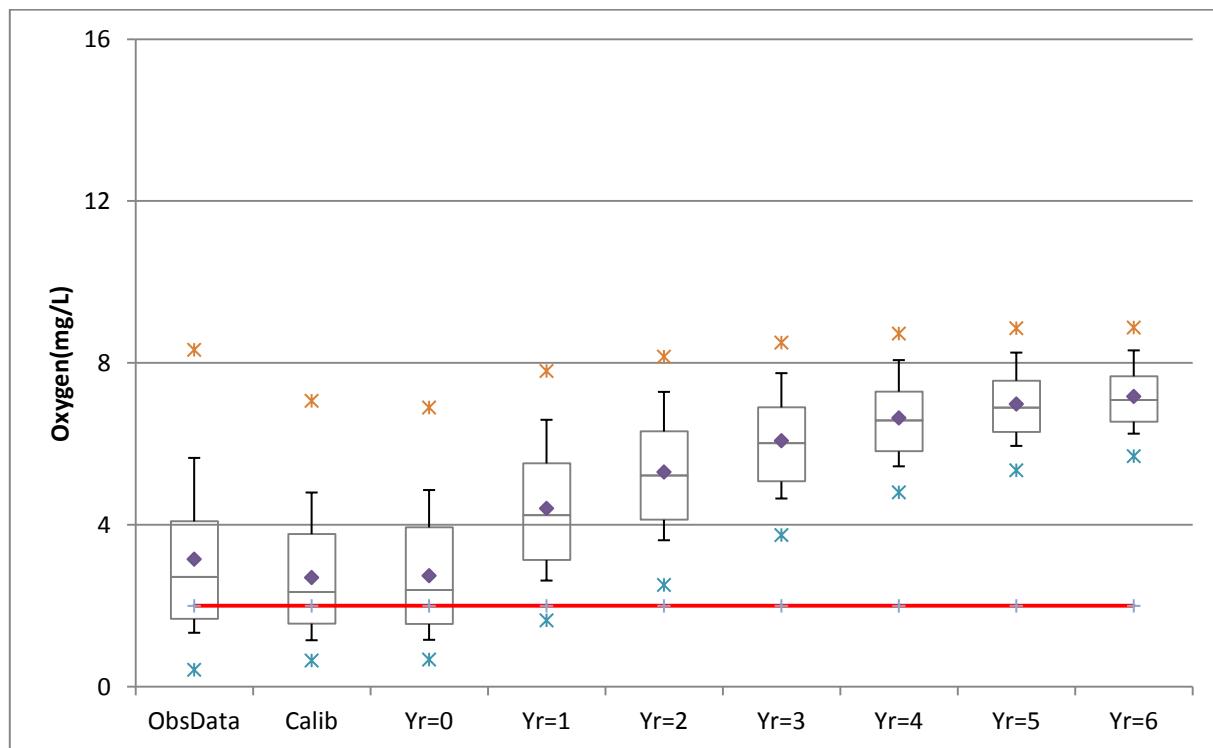

Figure 6. Seasonal bottom DO for spinup of 75% reduction run

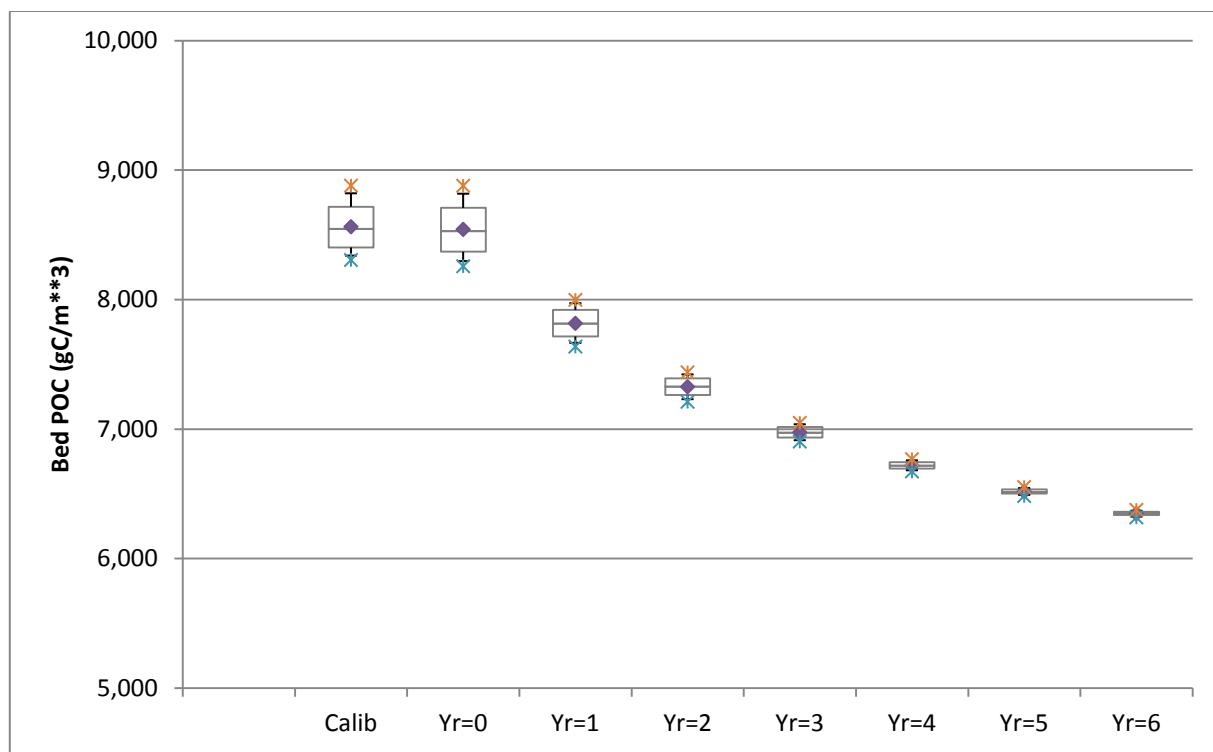

Figure 7. Seasonal sediment bed POC concentration for spinup of 75% reduction run

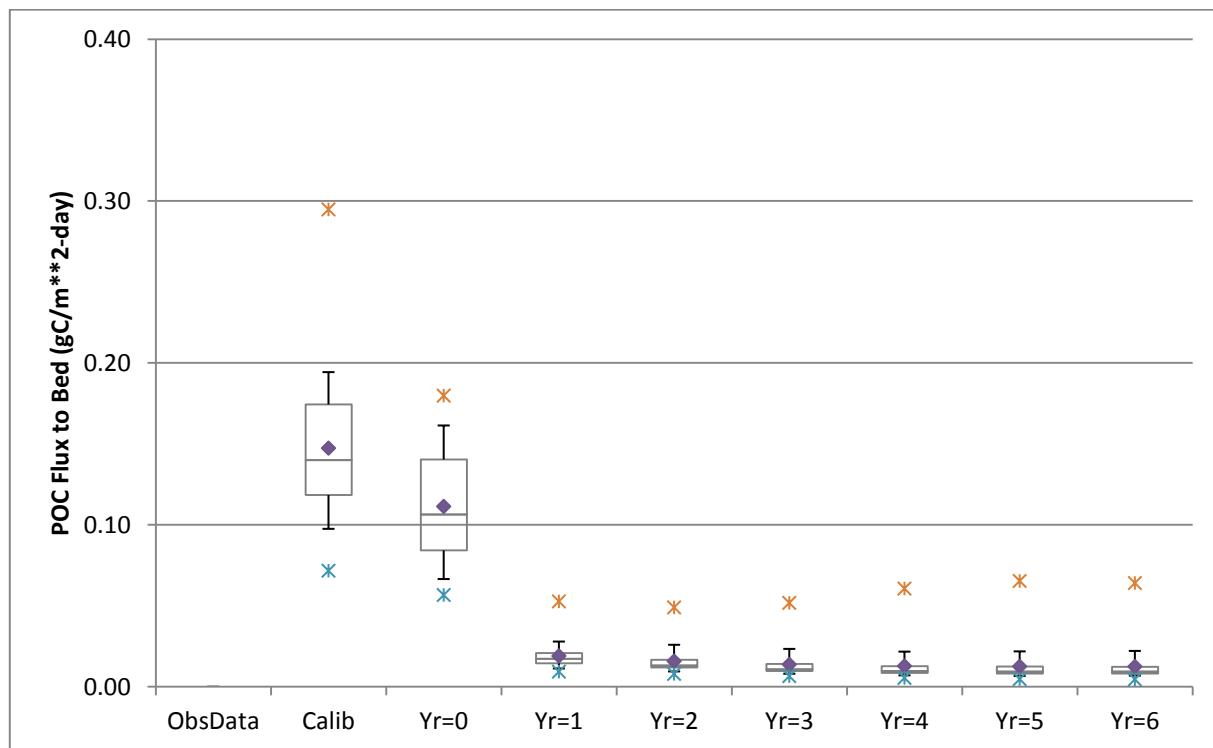

Figure 8. Seasonal POC flux for spinup of 75% reduction run

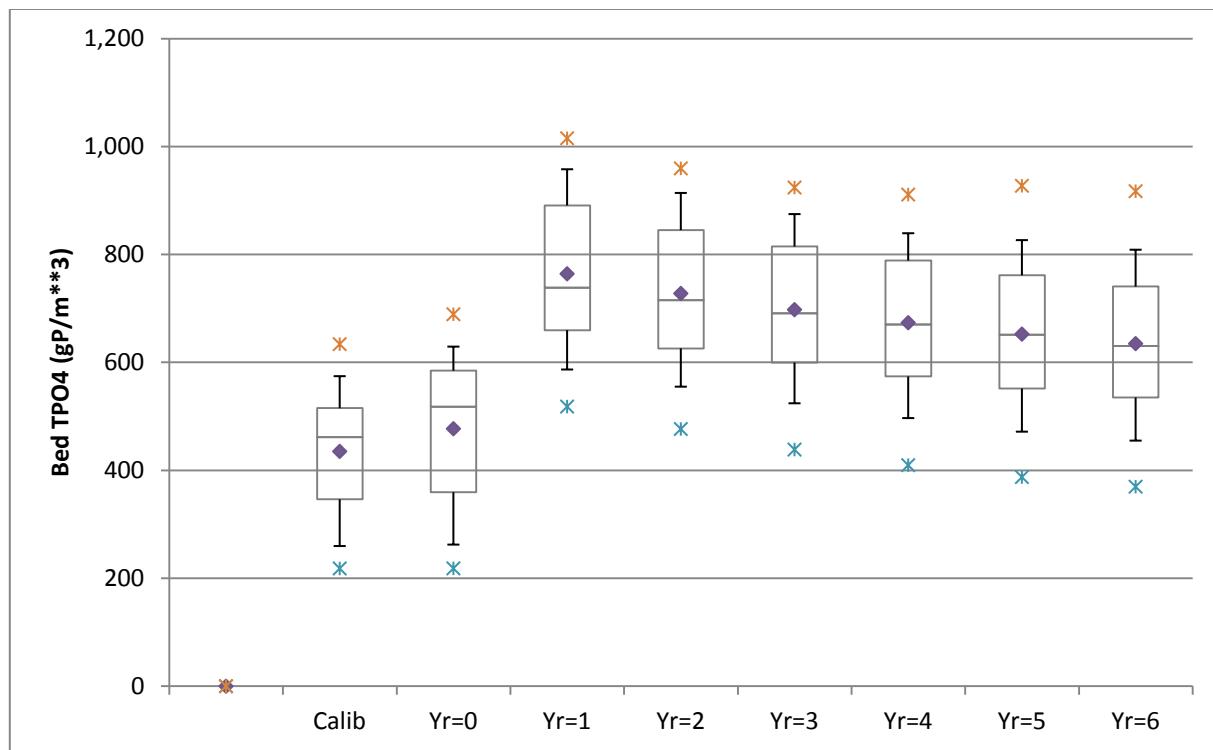

Figure 9. Seasonal sediment bed PO<sub>4</sub> concentration for spinup of 75% reduction run

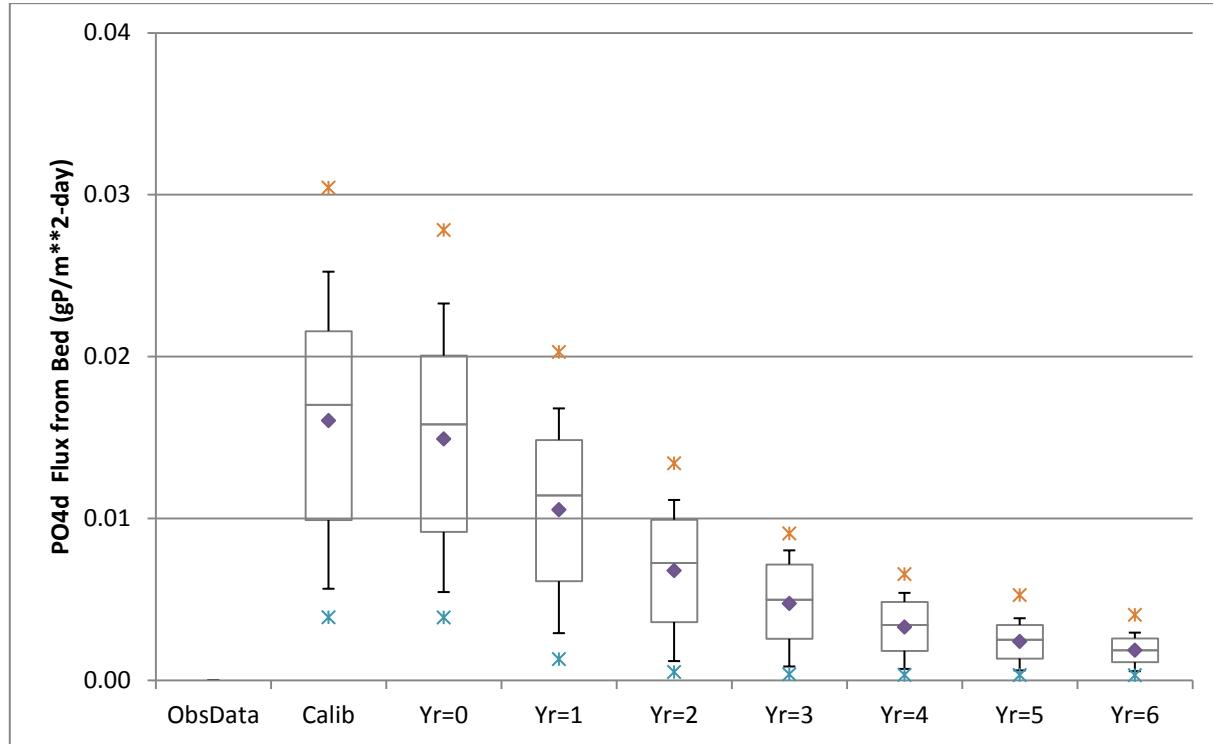

Figure 10. Seasonal PO<sub>4</sub> flux for spinup of 75% reduction run

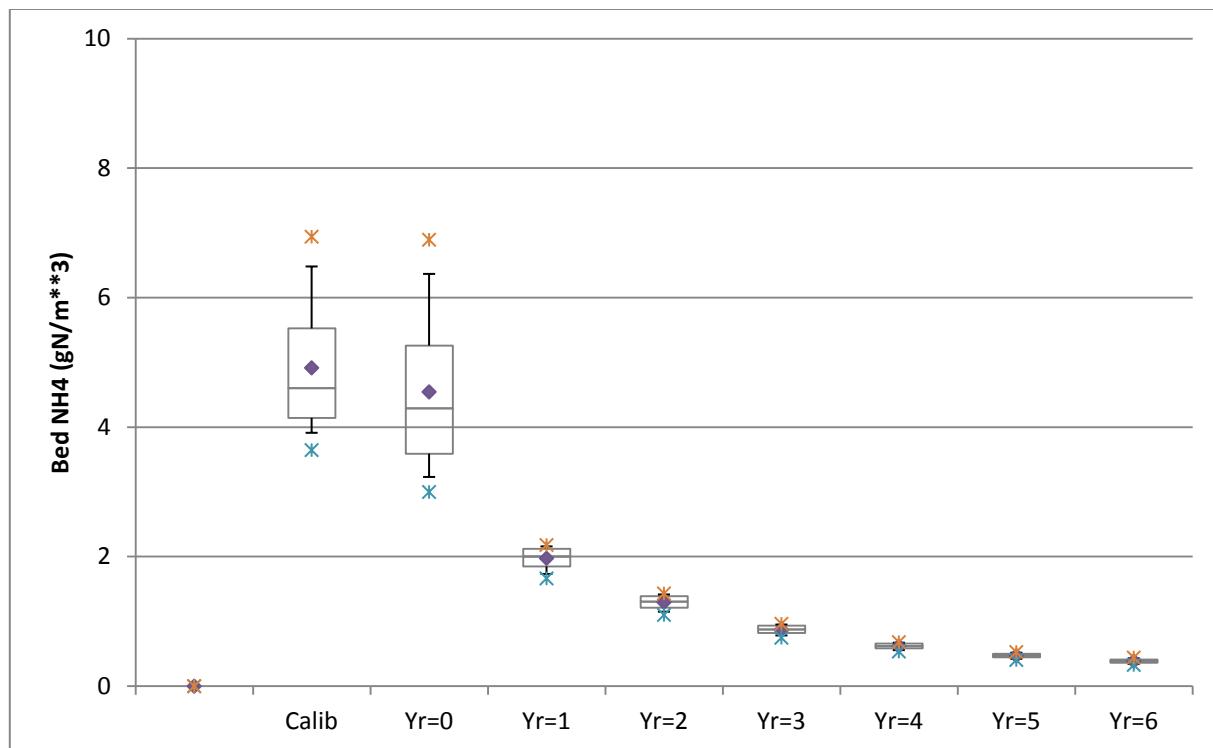

Figure 11. Seasonal sediment bed NH<sub>4</sub> concentration for spinup of 75% reduction run

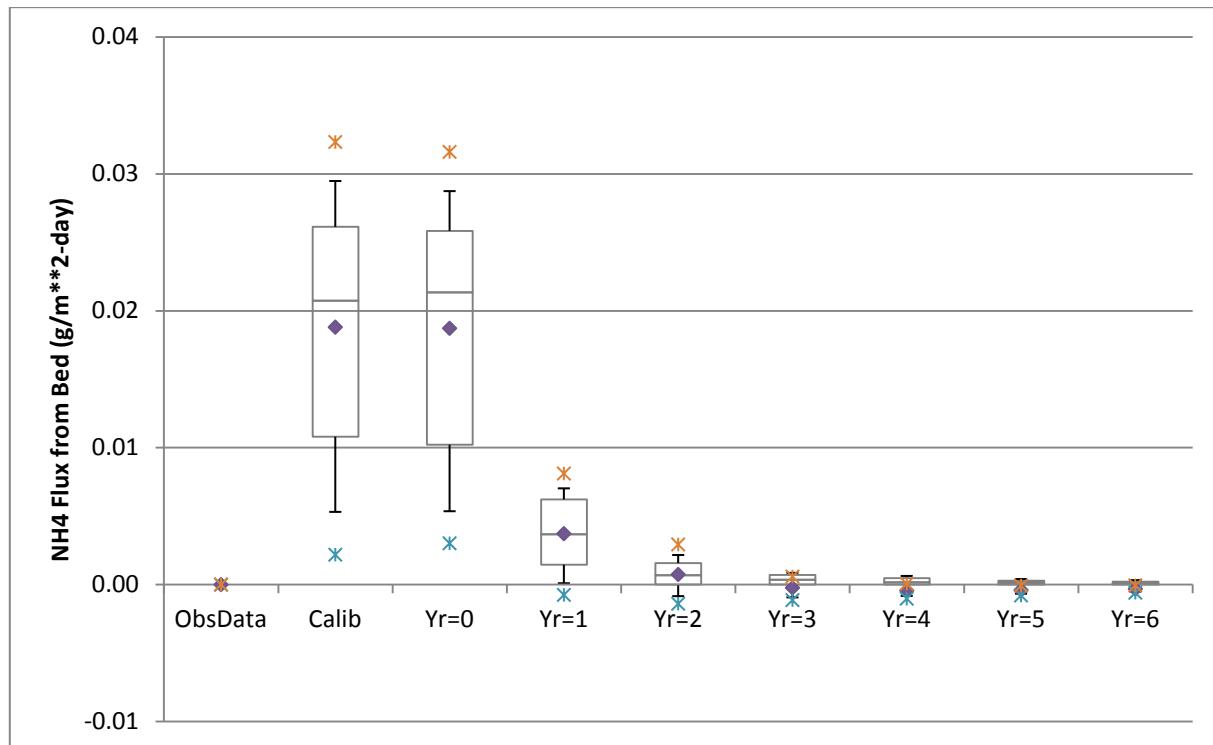

Figure 12. Seasonal NH<sub>4</sub> flux for spinup of 75% reduction run

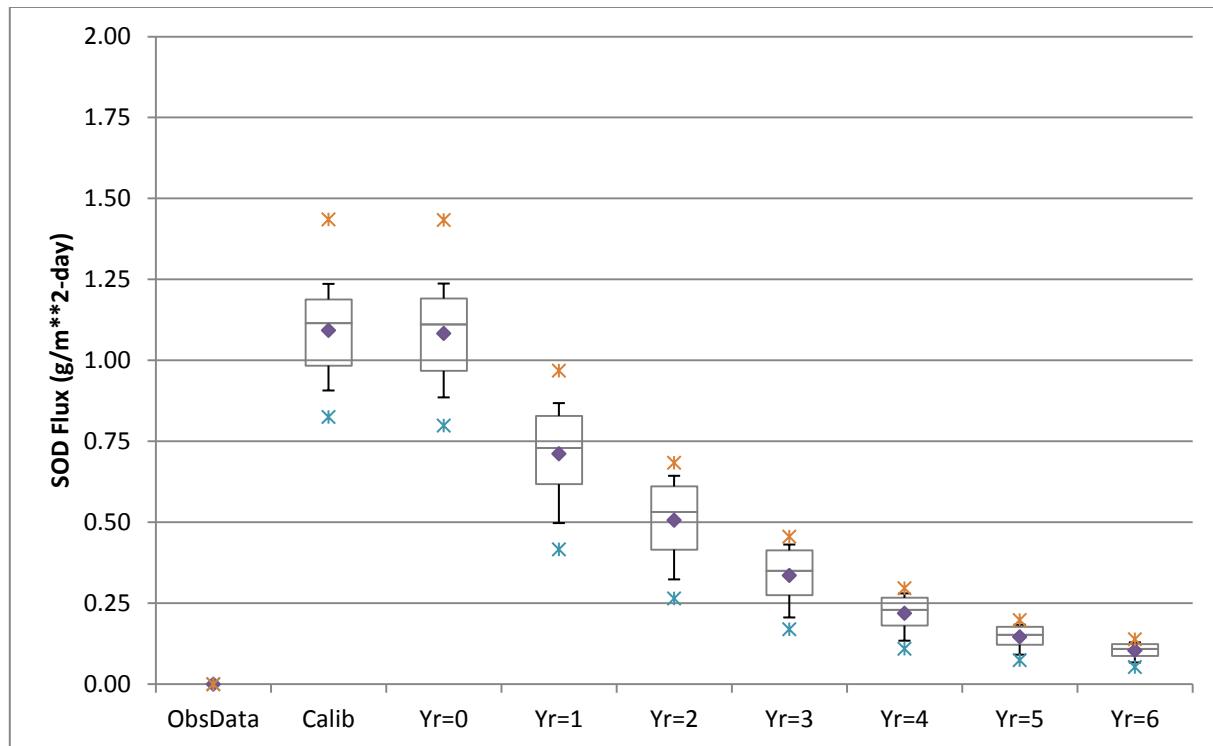

Figure 13. Seasonal SOD for spinup of 75% reduction run
