<sup>(1)</sup> Annual arithmetic mean

<sup>(2)</sup> Not to be exceeded more than once per year

<sup>(3)</sup> Not to be exceeded more than once during a 3-year period as provided in 40 CFR 50, Appendix R.

<sup>(4)</sup> The standard is attained when the computed 3-year average of the annual 4th-highest daily maximum 8-hour average does not exceed 0.075 ppm, as provided in 40 CFR 50.15.

<sup>(5)</sup> The standard is attained when the annual arithmetic mean is equal to or less than the numerical standard as determined by 40 CFR 50, Appendix N.

<sup>(6)</sup> PM10 and carbon monoxide have no secondary standard.
