GARBE: Good morning, madam chair, members of council and members of the public. We are once again bringing before you a proposal for updates to our aerospace coating operations rule. This proposal is the same one that the council voted on at the January meeting. These proposed rule changes were presented before the Air Quality Advisory Council in June. And October of 2018. And January of 2019. And before the environmental quality board in February 2019. The changes the board acted in favor of adoption at the February 2019 meeting. A	4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	wait a minute, let me send over the right version. I guess it has to go all the way back through the process? Obviously it does. I was curious. MR. TERRILL: Madison, do you want to explain the legal details. But the essence of it is, yes, once it gets in the system you can't withdraw it. Because we looked at numerous ways to do that. And there was just no way to accomplish it. So, Madison, you want to add to that? MS. MADISON MILLER: Yes. So, under the rules on rule-making, once we submit the rules, after the board, we have 10 days to correct it or to withdraw it and resubmit the correct version. And when this was discovered, it was past that due date. So the only option we had was to withdraw. MS. BOTCHLET-SMITH: Other questions from the council?
