# Message from the **Executive Director**

What a year this has been! When fiscal year 2020 began, DEQ had just rolled out its new website and was well on its way to implementing the strategic plan, Leading the Way, to focus on customer service and efficiency. The Environmental Education program was gearing up for a full slate of programs to help Oklahoma's students understand the importance of protecting the state's vital natural resources. In addition to writing permits, performing inspections, and investigating complaints, DEQ staff was hard at work with many volunteer efforts to keep Oklahoma's environment clean.

Then...Covid-19 happened, and the world changed.

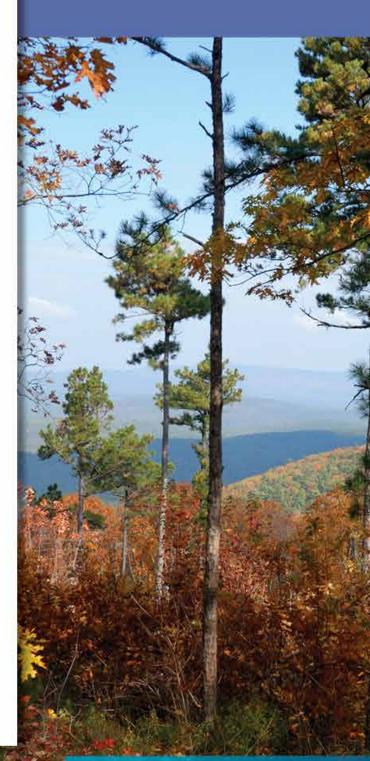

Instantly, our top priority became the well-being of our employees, our customers, and all Oklahomans. Almost overnight, nearly all DEQ employees transitioned to a telework status and innovation became the norm to ensure vital services continued. We established a dedicated website to provide up-to-date information on actions taken during the pandemic, expiring licenses and certifications were temporarily extended, staff continued to receive and review permit applications, and our lab stayed open to receive and analyze water samples to ensure public and private water supplies were safe. The core responsibility of protecting Oklahoma's natural resources continued unabated.

I am incredibly proud of the perseverance and dedication of all DEQ employees to protect our environment and provide critical services to the citizens and businesses of Oklahoma during such unprecedented times. As always, DEQ employees go above and beyond for you.

Sincerely, Scott Thompson

# **Environmental** Quality Board

The Oklahoma Legislature established the Environmental Quality Board (EQB), comprised of Oklahoma citizens, to provide guidance to the DEQ. Board members have a variety of backgrounds in manufacturing, hazardous waste management, solid waste management, petroleum industry, agriculture, local government, engineering, conservation, rural water systems, and statewide environmental groups. These members are appointed by the Governor, confirmed by the Senate and serve a five-year term. Responsibilities of the board are the appointment of DEQ's Executive Director and the adoption of rules that determine operation of the department.

The Air Quality Advisory Council (AQAC) is authorized by the Oklahoma Clean Air Act to review air quality issues and hold public hearings as part of the state's rulemaking process. Once approved by the nine-member panel, proposed rules are recommended to the EQB. Upon EQB adoption, the rules proceed to the state Legislature and Governor for final approval and adoption.

AQAC members are appointed by the Governor for seven-year terms and represent a range of related professions as set forth in the Oklahoma Statutes. This year the council voted to retain Laura Lodes, representing the engineering profession, as Chair, and Gary Collins, representing the agriculture industry, as Vice Chair for the 2020 calendar year. The Council welcomed two new members this year. John Privrat was appointed to represent the transportation sector, taking over the unexpired term of Jim Haught, who resigned in January 2020. After eight years of service, Gerald Butcher retired from the Council. His replacement, Matt Caves, was appointed to represent the electric utility industry.

Three meetings were held during state FY 2020. At the October 2019 meeting in Oklahoma City, the AQAC recommended for adoption the annual update of Appendix Q, Incorporation By Reference, to incorporate the latest modifications to federal regulations, and updated language in Subchapter 2, Incorporation By Reference, to reflect the latest date of incorporation of EPA regulations in Appendix Q. The appendix is updated annually to incorporate federal regulations relating primarily to New Source Performance Standards (NSPS) and National Emission Standards for Hazardous Air Pollutants (NE-SHAP) that will be enforced by the state.

Additionally, at the October meeting, the AQAC recommended for adoption by the EQB changes to Oklahoma Administrative Code (OAC) 252:100-13, Open Burning, to conform the DEQ rules to statutory changes enacted in the 2019 legislative session. A new section, 252:100-13-8.1, was added to incorporate statutory changes which added a provision for open burning of certain medical marijuana plant parts, and modified when an air curtain incinerator (ACI) is required. An amendment to Section 13-2. Definitions. changed the terminology from "watch" to "alert" for ozone and particulate matter notifications. Section 13-7(1), Fire training, was amended to clarify specific inspection and removal requirements as provided for in the

Oklahoma Clean Air Act. Finally, DEQ amended OAC 252:100-39 to revoke Section 49, Manufacturing of fiberglass reinforced plastic products, in order to ease the regulatory burden on applicable facilities by revoking an outdated rule that was dually regulating alongside the federal NESHAP Subpart WWWW.

The second meeting of FY-20 was held in January 2020 in Oklahoma City. At that meeting, the AQAC recommended to the EQB for adoption of new amendments to OAC 252:100-17, Incinerators, to clarify the applicability of Part 9, Commercial and industrial solid waste incineration units (CISWI), to existing air curtain incinerators. The changes to Subchapter 17 will be included as part of the required update to Oklahoma's Section 111(d)/129 plan. This rulemaking is intended to update the rule in accordance with recent changes to the federal emission guidelines in 40 CFR Part 60, Subpart DDDD. Also at the January meeting, the AQAC recommended amendments to OAC 252:100-39-4, Exemptions, to remove an incorrect citation to a revoked rule and recommended amendments to OAC 252:100-39-16, Petroleum refinery process unit turnaround, to update the timeframe listed as the non-oxidant season.

All rules adopted by the Council for the October 2019 and January 2020 meetings were subsequently approved by the EQB and approved by the legislature and Governor. Those rules will go into effect on September 15, 2020. The third and final meeting of FY 2020 was held in June 2020 using an entirely virtual meeting format. Rules considered at that meeting were deferred to the October 2020 Council meeting. The proposals include significant changes to Chapter 4 and Chapter 100 rules to remove obstacles in obtaining approval from EPA for relevant portions of Oklahoma's State Implementation Plan (SIP) relating to the Department's issuance process and public participation procedures for New Source Review (NSR) construction and Title V operating permits, to help ensure that the Department retains approval of these programs.

Also considered at the June meeting were several changes to Chapter 110, Lead-Based Paint Management, to update the rule in accordance with recent changes to the federal lead-based paint poisoning prevention requirements and to provide reciprocity for active duty military service members and their spouses.

\*Chair \*\*Vice Chair

The Hazardous Waste Management Advisory Council met on July 18, 2019, and October 10, 2019, in Oklahoma City. The primary purpose of the July meeting was to preview upcoming rule proposals. The primary purpose of the October meeting was a council vote to approve the annual Incorporation by Reference (IBR) update. The primary IBR intent was to change the IBR date to 2019 to ensure equivalency with the federal program. Specific rule changes included new EPA rules related to vehicle airbags and new rules involving pharmaceutical wastes. There were also technical corrections made to existing state rules, to ensure that Oklahoma's hazardous waste rules are at least equivalent to the federal rules. The division made a budget presentation, meeting dates were set for next year, and the meeting was adjourned.

## Hazardous Waste Fund

The Department of Environmental Quality Hazardous Waste Fund is authorized by the Hazardous Waste Fund Act, 27A O.S. § 2-7- 301 et seq. There was \$37,319 received in income to the Hazardous Waste Fund in FY 2020, derived from administrative penalties associated with violations of the Oklahoma Hazardous Waste Management Act, 27A O.S. § 2-7-101 et seq. According to Section 2-7-304 of the Hazardous Waste Fund Act, monies in the Hazardous Waste Fund may be used for protection of public health and safety, basic emergency response training and protective equipment, environmental response and remediation, and assistance to local governments with development of emergency response plans. In FY 2020, DEQ used these funds to provide mercury collection and disposal services for 30 Oklahoma households.

The Water Quality Management Advisory Council (WQMAC) is made up of 12 members, who are appointed for three-year terms and who represent a wide variety of interested parties. Four members are appointed each by the Governor, the Speaker of the House, and the President Pro Tempore of the Senate. WQMAC typically meets four times a year; however, additional meetings are sometimes scheduled in order to address a rule change that does not fit the regular meeting schedule.

WQMAC reviews and recommends rules governing water quality to the EQB. Currently, 23 chapters of rules are under the authority of WQMAC. These include regulations for laboratory accreditations,

laboratory services, industrial and municipal wastewater, general water quality, wastewater lagoon and land application systems, pretreatment, minor public water supply, public water supply, water and wastewater construction standards, biosolids, water reuse, drinking water state revolving fund, small public and private sewage systems, septage pumpers and transporters, underground injection control, implementation of water quality standards, and waterworks and wastewater works operator certification.

During FY 2020, the WQMAC met on October 1, 2019, and January 7, 2020. The Council passed rule changes to Chapters 641 and 710.

# **Solid Waste Management Advisory** Council

The Solid Waste Management Advisory Council (SWMAC) serves as the initial rulemaking body for Solid Waste Management within the Land Protection Division and operates under authority of the Oklahoma Solid Waste Management Act. The SWMAC holds public hearings, reviews solid waste issues, and provides expertise about various solid waste issues. All solid waste rules and regulations must first be reviewed and approved by the SWMAC before being recommended to the EQB.

Once approved by the EQB, the rules proceed to the Legislature and the Governor for final approval. The SWMAC is composed of 10 members who represent specific areas of expertise as described by 27A O.S. 2-2-201(E), in the Oklahoma Environmental Quality Code. During FY 2020, the SWMAC met on July 11, 2019, September 12, 2019, and January 16, 2020. The Council recommended rule changes to Chapter 515 related to cost estimates and financial assurance.

# **Radiation Management Advisory Council**

The Radiation Management Advisory Council met in Tulsa on September 26, 2019. The Council members approved changes to the DEQ rules for radiation use in medicine that are required to maintain compatibility with federal rules. Due to an administrative oversight

# Revolving Funds

## OSEE Federal Funds 7%

## State Appropriations **8%**

# **Environmental Quality Report**

The Department of Environmental Quality (DEQ) is required by statute to annually submit an "Environmental Quality Report" to the Governor, the President Pro Tempore of the Senate, and the Speaker of the House of Representatives. It is to summarize DEQ's annual budget needs for providing the environmental services within its jurisdictional areas, new federal mandates, and state statutory or constitutional changes recommended by DEQ. The report must be reviewed and approved by the Environmental Quality Board prior to its submittal to the Governor and legislative leaders.

## I. ANNUAL BUDGET REQUEST<sup>1</sup>

DEQ is slated to receive \$8,009,249 in state appropriated funding for current State Fiscal Year (SFY) 2020. This represents an increase of approximately 23% from the SFY 2019 appropriation of \$6,493,879, although it is still about a million dollars less than DEQ received as recently as SFY 2014. The 23% increase is divisible into three roughly equal parts: to offset the across-the-board state employee pay increase passed by the legislature in 2019; to update and upgrade laboratory equipment; and to fund programs to assist rural public water supply systems.

The impact of DEQ revolving fund sweeps by legislative action in the last few years that total \$33 million dictates that DEQ request appropriated funds for replacement of its rapidly deteriorating parking garage. The parking garage replacement is estimated to cost approximately \$13 million. Adding this figure to the presumed static base appropriated funding of \$8,009,249 means that DEQ, with the approval of the Environmental Quality Board, is requesting a general revenue appropriation of \$21,009,249 for SFY 2021. The specifics of this request are contained in Appendix A to this report.

DEQ's total budget for SFY 2021 – including fee revenues and federal funds, which are also variable from year to year – is indeterminate as of the date of submittal of this report. The total DEQ budget for current SFY 2020 is just over \$97,000,000, comprised of approximately 8% state general revenue funding, 37% federal funding, 8% federal funding for the Office of the Secretary of Energy and Environment, and 46% fee funding. Appendix B contains additional details. Should state or federal funding substantially decrease, DEQ would have to further reduce activities and/or secure additional fee funding.

Because requests for state appropriations are due by October 1, the appropriation request information in this portion of the Environmental Quality Report was previously considered and approved by the Environmental Quality Board at its September 10, 2019, meeting

## For consideration and approval by the Environmental Quality Board on November 8, 2019

## II. FEDERAL MANDATES<sup>2</sup>

## **AIR QUALITY DIVISION** (AQD)

## **AIR POLLUTION CONTROL**

## **Volkswagen Settlement**

As part of its settlement with EPA for using "defeat devices" on vehicles to falsify emissions test results, Volkswagen (VW) was required to establish a mitigation trust fund to pay for defined eligible projects that reduce NOx. Oklahoma's portion of this fund is approximately \$20.9 million. DEQ is the Lead Agency to act on behalf of the State of Oklahoma with respect to the mitigation trust, with oversight provided by the Oklahoma Secretary of Energy & Environment.

Oklahoma's Beneficial Mitigation Plan was accepted by the Wilmington Trust, which is overseeing the VW trust settlement and implementation. The plan outlines the types of projects eligible for funding and demonstrates how Oklahoma will meet the requirements from the VW settlement related to spending of the funds for NOx reductions.

Phase 1 of Oklahoma's plan is composed of two program elements. The first element is grants for the Alternative Fuel School Bus Program. Firstround grant applications closed in December 2018. Projects have been awarded and work is underway. The second element involved AQD collaboration with the Oklahoma Corporation Commission, Oklahoma Department of Transportation, and Oklahoma Secretary of Energy and Environment to develop a Request for Proposal for Zero Emissions Vehicles Supply Equipment and Infrastructure, also known as ChargeOK: Oklahoma Electric Vehicle Charging Grant Program. The application period closed March 1, 2019. Projects have been selected and work will begin once the necessary memorandums of understanding are finalized. Periodic updates are posted to DEQ's website.

## **Ozone National Ambient Air Quality Standard**

All of Oklahoma is currently designated as attainment/unclassifiable for the 70 ppb 8-hour National Ambient Air Quality Standard (NAAQS) for ozone.

After a challenging 2018 ozone season, the 2019 ozone season has been a relatively good one to date, but there remains the possibility of violating the standard at two Oklahoma City sites before the end of 2019. Even if a violation in 2019 is avoided, the current tenuous compliance status ensures that the risk will carry into the 2020 season.

To reduce the potential for nonattainment, AQD will continue to cooperate with the Councils of Governments (COGs) across the state, and especially the Indian Nations Council of Governments (INCOG) and the Association of Central Oklahoma Governments (ACOG), on educational efforts and continued implementation of voluntary "Ozone Advance" plans. AQD will also continue the work started in 2019 to investigate sources emitting the precursors of ozone (NOx and volatile organic compounds) to help determine if local sources could be impacting values in the Oklahoma City area. ACOG is in the process of soliciting funding partners for a potential cost-ofnonattainment study.

## **Regional Haze**

The goal of the 1999 EPA regional haze rule is to achieve natural visibility conditions at all designated Class 1 Areas by the year 2064. Oklahoma must develop and update a long-term strategy for reducing visibility impairment at its Class 1 Area, the Wichita Mountains Wilderness Area (WMWA)Additionally, Oklahoma must address emissions that affect Class 1 Areas outside of the state. Oklahoma submitted a state implementation plan (SIP) for the first planning period in 2010 with a revision in 2013. The required five-year progress report was submitted in 2016 and EPA's approval was published on June 28, 2019.

The next SIP submittal, for the second implementation period (Round 2), is due July 31, 2021. In preparation for the Round 2 submittal, AQD is working closely with the Central States Air Resource Agencies Association (CenSARA), neighboring states, tribal partners, federal land managers, and EPA. This implementation plan will require AQD to present a long-term strategy that meets a 2028 reasonable progress goal for visibility improvement at the WMWA. Data from the Interagency Monitoring of Protected Visual Environments (IMPROVE) network will be used to determine when visibility at the WMWA is most impaired by non-natural sources of air pollution, as well as which pollutants cause the greatest impact. AQD will analyze photochemical modeling and emission inventories to identify any potential sources of concern, which will be further investigated for visibility impacts at the WMWA. The ensuing long-term strategy will be built using these analyses and any benefits from pollution reduction identified by neighboring states. AQD will also be focusing effort toward replacing the federal implementation plans from the first implementation period with an approved Round 2 SIP.

## Affordable Clean Energy (ACE) Rule

The ACE rule became effective September 6, 2019. The rule package included the following components: (1) repeal of the Clean Power Plan; (2) emission guidelines for greenhouse gas (GHG) emissions from existing coalfired power plants; and (3) revisions to the timeline that states must follow in submitting State Implementation Plans (SIPs) to address federal emission guidelines. The heart of the ACE rule is a set of requirements for heat rate improvements (efficiency improvements) that would be applicable to coal-fired power plants. States are expected to address the requirements of the ACE rule by promulgating state rules that are equal to, or more stringent than, the federal requirements. States are then expected to submit those rules to EPA as a SIP. If a state does not submit a SIP, EPA may promulgate a federal implementation plan (FIP) which applies to facilities in the state. AQD is monitoring EPA's rulemaking efforts and is in consultation with other states. The SIP is due to EPA on July 8, 2022.

<sup>2</sup> The list of federal mandates is not exhaustive but covers recent or impending requirements or major developments that are among the most significant to the state and DEQ.

## LAND PROTECTION DIVISION (LPD) SOLID WASTE

## **Coal Combustion Residuals (CCR)**

EPA is proposing revisions to the federal CCR rule, contained in 40 CFR 257. Revisions may need to be made to OAC 252 Chapter 517 to ensure it remains at least as stringent as the federal Part 257 rule and compliant with EPA program approval. Part 257 continues to evolve. Additional changes are anticipated as EPA rewrites vacated and remanded portions of the rule. Additionally, EPA's approval of Oklahoma's permitting program has been challenged in the courts. Those court decisions could impact Oklahoma's program. New federal permitting rules are expected to include expiration and renewal provisions. Should Oklahoma incorporate similar provisions into Chapter 517, it is anticipated that time and effort required of LPD staff will increase as a result.

WATER QUALITY DIVISION (WQD), along with STATE ENVIRONMENTAL LABORATORY SERVICES DIVISION (SELS) and ENVIRONMENTAL

## COMPLAINTS & LOCAL SERVICES DIVISION (ECLS)

## WASTEWATER/WATER REUSE

## Waters of the United States (Clean Water) Rule

In September 2019, EPA and United States Army Corps of Engineers (USACE) completed "Step One" of their revocation and reissuance of the Waters of the United States (aka Clean Water) Rule. Step One returns EPA and USACE to the pre-2015 regulatory definition of Waters of the United States, by dispensing with the 2015 rule adopted under the Obama administration. EPA and USACE are working on Step Two, which is to propose a replacement rule. At this point it is unknown what the Step Two rule will include and what the implications might be for DEQ.

## EPA Oil and Gas Extraction Effluent Limitation Guideline Review

EPA has completed a review of the Effluent Limitation Guidelines (ELGs) for discharges related to oil and gas exploration and production. EPA will make a determination of which ELGs will be revised, eliminated or left "as is." As a result of legislation and a subsequent MOU with the Oklahoma Corporation Commission, DEQ will become the permitting authority in Oklahoma, once delegation of the program from EPA Region 6 occurs. The change in workload and the timing of that change is dependent on the magnitude of the revisions EPA makes to the ELGs and when authority is delegated to DEQ. In the interim, EPA has committed to meetings with the oil- and gas-producing states and other stakeholders as EPA moves forward. WQD will need to participate in those meetings in order to have a voice in the outcome, which will impact oil and gas producers and affect DEQ staff workload.

## Water Reuse Action Plan (WRAP)

EPA began working on the WRAP, a non-regulatory initiative to advance water reuse across the country, in late 2018, and opened the draft plan for public comment in September 2019. EPA is soliciting input and commitments by states, regulated community and NGOs. DEQ has been reviewing and offering comments on appropriate actions for EPA, and encouraging EPA to recognize the efforts that states have taken to advance water reuse. Additionally, DEQ is meeting with EPA to promote allowing states to continue operating their water reuse programs without having to convert to a "one size fits all" approach for water reuse. There has already been a significant amount of staff time spent working on this federal initiative, and it is expected that the workload will continue to increase.

## **DRINKING WATER**

## Perchlorate

Percholorate was listed in the First Unregulated Contaminant Monitoring Rule in 1999. After gathering data, in 2008 EPA determined that perchlorate would not be regulated. However, EPA reversed course in 2011 and announced there would be a perchlorate rule. In June 2019, EPA finally published a proposed rule with an MCL of 56 ug/L, and invited comments on other options as well. The final rule is scheduled for publication in late 2020. This rule will create a substantial workload increase for compliance, technical assistance, and laboratory analysis, and likely for enforcement as well.

## **Revised Lead and Copper Rule**

EPA released this proposed rule on October 10, 2019. If finalized, it would modify the existing lead and copper rule with respect to sampling, corrosion control, lead line replacement, etc. Public water supply (PWS) systems would be significantly impacted, and DEQ's workload with respect to lead will increase, which will affect WQD, ECLS, and SELS.

## America's Water Infrastructure Act of 2018 (AWIA)

The AWIA adds provisions regarding drinking water programs. Some elements are mandatory; one is optional. The optional program is of particular interest to the Governor and the Secretary of Energy & Environment. WQD, SELS, and ECLS will be expending significant resources on these new provisions. Among the most notable provisions are:

#### • Lead Testing in Schools and Daycares.

This program is not mandatory under AWIA. However, DEQ is participating in a statewide effort with other agencies and the Office of the Secretary of Energy & Environment to address a critical gap that currently exists in efforts to protect public health: the testing of individual taps and water fountains in schools and child care centers. PWS testing as mandated by the existing Lead and Copper Rule does not examine these points of use, and these facilities serve sectors of the population – young children and pregnant/nursing mothers - most vulnerable to the health effects of lead. This program is primarily the responsibility of the WQD Capacity Development Section, which is also responsible for the water loss audit program.

#### Asset Management.

DEQ is required to modify the agency's capacity development strategy to describe how it will encourage the development by PWS systems of asset management plans and assist in the training of PWS operators or other personnel to implement the plans. DEQ must report on these activities in a triennial report. These new requirements will impact the workload of the Capacity Development Section. It is anticipated that if DEQ implements this program internally, one or two FTEs will be needed. If DEQ chooses to contract with a technical assistance provider, like the Oklahoma Rural Water Association, additional money will be needed to fund the contract.

#### Risk Assessment and Emergency Response.

Community PWS systems that serve more than 3,300 people are required to complete a risk and resilience assessment and develop an emergency response plan. DEQ has been working with systems on this type of effort due to the state's many natural disasters. Under AWIA, deadlines for the risk and resilience assessments range from March 31, 2020, to June 30, 2021, depending on system size. DEQ will be providing technical assistance to the PWS systems and reporting to EPA.

#### Consumer Confidence Reports.

Starting in December 2020, AWIA increases the frequency of Consumer Confidence Reports(CCRs), which notify customers of any violations, from annually to semiannually for some systems. Failure to issue CCRs and deficiencies in them are already among the most frequent violations for drinking water systems, especially small systems. DEQ has purchased software to assist in developing these reports and will continue to train systems.

#### Consolidation Assessment.

This AWIA provision authorizes primacy states or EPA to assess options for consolidation or transfer of ownership of non-compliant PWS systems when:

o a public water supply system has repeatedly violated one or more primary drinking water regulations, and is unable or unwilling to take feasible and affordable actions to address compliance

or has undertaken actions to address compliance but has not achieved compliance;

- o consolidation, transfer, or other action is feasible; and
- o consolidation could result in greater compliance with the Safe Drinking Water Act (SDWA).

Also, limited liability protection is afforded for systems acting pursuant to an approved consolidation plan. EPA is currently in the rulemaking process to implement this provision, with publication expected in the spring of 2020. Staff time will be required to review and approve consolidation assessments, provide technical assistance to consolidating systems, etc. It is unknown how many systems will voluntarily participate or whether any systems will be required to participate based on compliance history.

## Water Infrastructure Improvements for the Nation Act (WIIN)

#### • Small and Disadvantaged Communities.

This is a grant program to assist PWS systems in underserved, small, and/or disadvantaged communities in meeting SDWA requirements. The funding available can be used to pay for infrastructure projects, technical/managerial/financial (TMF) capacity-building activities, or activities necessary to respond to a contaminant. WQD's Capacity Development Section views this program as a means to help address the most pressing TMF capacity issues identified by the Capacity Development Baseline Assessment. There is a 45% cost share requirement for this grant, which can be met by funding that is already committed to TMF capacity development work.

## MISCELLANEOUS

## Per- and Polyfluoroalkyl Substances (PFAS)

PFAS compounds, which are receiving increasing public and Congressional attention, continue to be an area of focus for EPA and the Department of Defense in particular. Some stakeholders want EPA to establish drinking water Maximum Contaminant Levels (MCLs), wastewater discharge and biosolids standards, groundwater clean-up levels, etc. Action on any of these chemicals will present challenges for DEQ, including rulemaking, staffing to implement the new requirements, training for the regulated community and DEQ staff, and procuring needed laboratory equipment. Even now, there is significant DEQ staff time spent tracking activities, attending meetings, and responding to questions or concerns from facilities and the general public. That will increase when new requirements are established, especially impacting WQD, SELS, and ECLS, as well as LPD.

## **III. LEGISLATIVE RECOMMENDATIONS**

The following are proposed as possible DEQ "request" bills for the 2020 Oklahoma regular legislative session..

## PARKING GARAGE FINANCING

DEQ's employee parking garage for its Oklahoma City headquarters building requires replacement. DEQ will seek a legislative appropriation and/or use of the Maintenance of State Buildings Revolving Fund to fund this project. In the alternative, DEQ could rely on previous permission from the state Long-Range Capital Planning Commission to proceed on the parking garage project utilizing bond financing. The agency must obtain legislative authorization for bond financing.

## ELIMINATE OR EXTEND SUNSET DATE FOR ADVISORY COUNCILS

Senate Bill 1027 (2019) sunsets the Water Quality Management Advisory Council, Hazardous Waste Management Advisory Council, Solid Waste Management Advisory Council, and Radiation Management Advisory Council on July 1, 2020. DEQ believe elimination of these advisory councils would seriously and unnecessarily weaken the current robust opportunities for input on DEQ rulemaking and state environmental policy by industry, local government, environmental organizations and the general public. The cost savings would be minuscule. Unless DEQ is able to confirm prior to the bill request deadline that an omnibus bill and open committee process will ensure consideration of the continuation of the councils, DEQ plans to request a bill that would eliminate the sunset provision, or at least extend it for several years.

# **Used Tire Recycling Program Triennial Report**

The Administration and Effectiveness of the Oklahoma Used Tire Recycling Program (FY17, FY18 and FY19) Report, also called the Used Tire Recycling Program Triennial Report, is available online at DEQ's Land Protection Division's Used Tire Recycling Program website. Click this link to view: https://go.usa.gov/xpAc4. For a more detailed version of this report, click the following link: https://go.usa.gov/xpA37.

## **APPENDIX A**

## Operations Funding Changes For the Fiscal Year Ending 06/30/2021

#### **On-Going Requests**

State Environmental Laboratory Services **Environmental Complaints & Local Services** Water Quality Division

Subtotal On-Going Requests

**One-Time Requests** 

Parking Garage

**Total Requests** 

#### **DEQ** – Parking Garage

DEQ is responsible for the maintenance of agency-owned facilities, which include a parking garage and surface lot for customer and employee parking. Due to continual legislative sweeps totaling \$33 million, we no longer have the funds to complete the replacement of the rapidly deteriorating parking garage. The garage has reached a critical point where we have had to close the top floor due to a punch-through. Additionally, we have had to close certain parking spaces throughout the garage due to concerns of falling concrete and potentially additional punch-through holes. This request is urgent and cannot be delayed any more. The agency has had to locate additional parking to relocate displaced employees. The area has very few options for parking and DEQ is unable to locate enough parking to accommodate our entire staff.
