On September 28, 2021, Bluewater Bay Marina applied for a Clean Vessel Act (CVA) grant to add new floating restrooms. The cost of the floating restrooms was more than projected but the marina will only receive the original awarded amount of \$25,965.00. After all expenses of the project for the floating restrooms, the total cost came to be \$95,736.62.

Tenkiller Ferry Lake is a 12,900-acre lake known for its natural shoreline and beautiful clear water. Bluewater Bay Marina lies on the northern end of the lake, south of Tahlequah, Oklahoma. The marina has the capability to hold up to 180 boats. Over 140 boats greater than 20 feet. Approximately 50% of the boats at the marina contain on-board sanitary facilities. The closest pump-out facility is more than five miles from the marina. Bluewater Bay Marina is currently under full renovation after the owners purchased it a few years ago. The marina has never had running water. They added floating restrooms, pump-out system holding tank, and will eventually add a pump-out system for boaters to discharge their on-board sewage. The marina anticipated building additional boat slips and would like to ensure the pump-out service is available to current and future customers with the growth of the marina.

On October 5, 2023, Cheryl Dirck visited the marina for a site assistance visit to verify the installation of the floating restrooms and that it was within DEQ regulations. The new floating restrooms meet the requirements for CVA reimbursement. Ms. Dirck reviewed the receipts, and all dates and costs are within the parameters of the CVA grant timeline. Bluewater Bay Marina is eligible for their awarded CVA grant funds.
