

SUBJECT: Small Quantity Generator Re-Notification Required Starting in 2021

Dear Small Business Owner/Operator:

Are you a small quantity generator (SQG) of hazardous waste (i.e., a generator of between 100 and 1,000 kg (220 and 2,200 lbs) of non-acute hazardous waste per month)?

SQGs in **Oklahoma** are now required to **re-notify every four years**. To remain in compliance with the re-notification requirement, you need to update your notification by completing and submitting the Notification of RCRA Subtitle C Activities (Site Identification Form), also known as EPA Form 8700-12, or state equivalent. The first re-notification is due by

**September 1, 2021**

SQGs are encouraged to submit the re-notification electronically via MyRCRAID by logging into RCRAInfo and requesting MyRCRAID permissions for your site (if you have not already registered). You can log into or register for RCRAInfo at <https://rcrainfo.epa.gov/rcrainfoprod/>. Then, you should create a New Submission and select the option to provide a subsequent notification. The form will be pre-populated with the most recent information for your site in RCRAInfo. Please review the information in each box for accuracy and update as necessary before submitting.
