

OKLAHOMA DEPARTMENT OF ENVIRONMENTAL QUALITY
NOTICE - DRAFT PERMIT MODIFICATION

The Oklahoma Department of Environmental Quality (DEQ) received an application for a solid waste permit modification for an expansion of the existing landfill operation at the East Oak Recycling Disposal Facility (RDF), located at 3201 Mosley Road, Oklahoma City, OK 73141. The existing East Oak RDF and the proposed expansion area is located within Section Twenty-one (21), Township Twelve North (T-12-N), Range Two West (R-2-W) of the Indian Meridian, Oklahoma County, Oklahoma. The application was filed by Waste Management of Oklahoma, Inc., 3201 Mosley Road, Oklahoma City, OK 73141 on January 10, 2020.

The DEQ has tentatively found that the application meets the requirements of Title 27A of the Oklahoma Statutes, Section 2-1-101, et seq., Section 2-10-101, et seq., and rules of the DEQ, Oklahoma Administrative Code (OAC), Title 252, Chapters 4 and 515, and has prepared a draft permit modification for public review.

The draft permit modification and its conditions propose an expansion of the existing East Oak RDF. The existing Municipal Solid Waste Landfill (DEQ Permit No. 3555036) currently receives residential and commercial waste, construction and demolition waste, non-hazardous other industrial waste, encapsulated asbestos waste, vegetative waste, and semi-solid wastes and sludges. The facility is submitting this permit modification to permit the expansion of existing landfill operations. With this expansion, the existing landfill permit boundary will expand from approximately 286.96 acres to a proposed 419.19 acres. The waste disposal area will increase from approximately 191.8 acres to 235.9 acres. Over the life of the facility, the expected average daily volume of incoming waste is projected to be approximately 1,746 tons per day. These projections are based on current market conditions and may vary as market conditions change. The existing groundwater and landfill gas monitoring systems will also be expanded to monitor the expanded site. Surface water drainage improvements that will occur with the expansion are providing final cover erosion control structures, perimeter drainage channels, and stormwater ponds. The site is also designed to prevent stormwater run-on to the active portion of the landfill during a 24-hour, 25-year storm event. The application includes two variance requests. The variance requests include (1) location of the disposal area as it relates to the existing 100 year-floodplain (OAC 252:515-5-32(a)), and (2) location of the site within an area designated as alluvium or terrace deposit (OAC 252:515-5-51(a)).

The DEQ contact is Hillary Young, P.E., Chief Engineer, Land Protection Division, DEQ, 707 N. Robinson, Oklahoma City, OK 73101-1677, Phone No. (405) 702-5100, Fax No. (405) 702-5101. The application, the draft permit modification, and related documents may be reviewed on DEQ's website at <https://www.deq.ok.gov/land-protection-division/permit-public-participation-process/> and locally at Midwest City Public Library, 8143 E. Reno, Midwest City, OK 73110.

Persons wishing to comment on the draft permit modification should submit their comments in writing electronically to DEQ at the website address above or to the DEQ contact listed above. Also, any person may request, in writing, a formal public meeting to present written or oral statements and data concerning the draft permit modification. A request for a public meeting must identify the nature of the issues to be raised in the meeting. If DEQ determines, based on the requests it receives, that there is a significant degree of public interest in the draft permit modification, it will schedule a public meeting and provide notice of the date, time and place.

Written comments and requests for a public meeting must be received by DEQ within 30 days after the date of this publication at the DEQ address given above. More specific information may be obtained by contacting the applicant, Pete Schultze, Waste Management of Oklahoma, 3201 Mosley Road, Oklahoma City, 73141; (918) 439-7828 or the DEQ contact listed above.
