

Farmland (ADM) Elevators A&B, Enid

Location: The site is located at 10th and Walnut in Enid, Garfield County, Okla., S/2 NE4 Section 5, T22N, R6W.

Background: The site, built in the 1930s, contains two large continuous grain storage elevators. Carbon tetrachloride was used for several decades as a fumigant to control pests. Gradual penetration of carbon tetrachloride in the subsurface has resulted in groundwater impacts.

Air: None addressed

Soil: No known soil contamination at this time.

Surface Water: No surface water in the immediate vicinity.

Groundwater: Groundwater flows to the east. Depth to water ranges between 14-20 ft. below ground surface.

Private/Public Wells: No wells have been identified

Vapor Intrusion to Indoor Air: No indoor air issues at this time.

Key Questions:

- **Have all known groundwater contaminant plumes been adequately evaluated and delineated?** Yes
- **Has the site been sampled for an adequate list of analytes?** Yes
- **Does soil or waste need to be cleaned up?** No
- **Has the surface water been sampled?** No surface water in the vicinity
- **Has soil at the site been cleaned up to levels protective of groundwater?** Yes
