Re: Administrative and Technical Reviews and Draft Permit Modification
Tier II Permit Modification – Change in Waste Type
North Tulsa Sanitary Landfill
Tulsa County
Solid Waste Permit No.: 3572001

Dear Mr. Hinds:

The Oklahoma Department of Environmental Quality (DEQ) received the Permit Application to accept NHIW (non-hazardous industrial waste) by email on March 29, 2022. The Update was submitted by E&E Engineering and Associates, LLC on behalf of North Tulsa Sanitary Landfill (NTSL).

NTSL is applying for a permit modification to accept NHIW for disposal. Oklahoma Administrative Code (OAC) 252:515-29-2 requires NTSL to implement a Waste Exclusion Plan (WEP) to detect and prevent the disposal of prohibited wastes. NTSL's WEP currently specifies that NHIW will not be accepted. OAC 252:4-7-59(2)(A) classifies a modification of a permit for a change in waste type as a Tier II modification.

NTSL published the notice of filing for the application in the April 14, 2022 edition of the *Tulsa World* in Tulsa, Oklahoma. An affidavit of the publication was received by DEQ by email on April 22, 2022. The public copy of the application was placed at the Tulsa City-County Public Library and an electronic copy of the application was placed on DEQ's Land Protection Division Web Page and in DEQ Central Records. NTSL has met the public notice requirements of 27A O.S. §2-14-301.

The application has been determined to be administratively and technically complete. Enclosed is a copy of the Draft Permit Modification for your review, together with instructions for the preparation, publishing and certifying of the legal notice as required in all Tier II applications. As noted in the instructions, please submit a draft of the legal notice to DEQ for review, prior to publication. Should you have any questions or require additional information, please contact Kaylee Shiplet of my staff at (405) 702-5196 or Kaylee.shiplet@deq.ok.gov.

Sincerely,

Hillary Young, P.E.
Chief Engineer
Land Protection Division

HY/ks
