HannStar Display Corporation has implemented a recovery plan for the state of Oklahoma. Information is listed on the following website:

<http://www.recycle4earth.com/HomeConsumerRecycling/ConsumerRecycling>

HannStar Display Corporation has partnered with a R2 and e-stewards certified recycler, 3R Network, Inc. to help implement the program. Details regarding the program are listed below.

1. **Option via “mail back program” # 1:** At no cost to the consumer, this mail back system will be available by emailing info@3Rnetwork.com or dialing toll-free number (888) 728-8194. Once the product has been validated, the consumer will be provided a pre-paid shipping label and

instructions on how to render the unwanted product to a convenient UPS/FED Ex location. The closest UPS/FED Ex location will be provided in the instructions.

2. **Option via “drop off program” # 2:** In cases in which the consumer does not wish to utilize the convenient mail back program provided in option #1, the customer may choose option #2. This drop off alternative is available by accessing www.recycle4earth.com or calling (888) 728-8194. By accessing www.recycle4earth.com and inputting one’s location, a list of the nearest drop off centers will automatically be displayed.

 3. **Option via “pick up program” #3:** If consumers deem the prior options inconvenient, they may contact (888) 728-8194 or email info@3Rnetwork.com in order to have their qualified device picked up at no charge. The pickup process will operate in the following steps:
 1. Customer contacts 3R Network via email (info@3Rnetwork.com) or toll free telephone (888) 728-8194 to provide the specifications of the electronic, including name, address, contact information, dimensions, approximate weight, category, and desired date of pick up.
 2. Once 3R Network has determined the electronic device is qualified as a CEE, a box with a UPS or FedEx code tag to the address given will be provided.
 3. Customers will receive the box and be given instructions for pick up. They will be as follows: place the electronic device inside of the package, apply the label given, notify 3R Network the package is ready for pick up and leave it at their door. UPS or FedEx will be notified by 3R Network for immediate pick up.
-
- ⇒ 3R Network will recycle computer and electronic equipment on behalf of HannStar Display Corporation and will not dispose of covered devices in landfills or transfer devices to recycling facilities that dispose of devices in landfills.
- ⇒ All equipment processed and recycled will be tracked and reported. Materials going for reuse are refurbished and tested for functionality, and residual focus materials are managed responsibly. Personal data on EOL electronics going to reuse or recycling are cleared or destroyed.
