SEMI-VOC

Sampling Guide For The Collection Of Method 8270 Liquid Sample

PRIOR TO COLLECTION

- Plan enough time to complete sampling; samples must be returned within **48 hours** of collection
- Ensure the Sample Kit has the following items:
  - Chain of Custody form
  - 3-1 Liter Amber Glass bottle per sampling point
  - barcode labels (if provided)
  - cooler for return shipping

SAMPLE COLLECTION

1. If sampling from a tap allow water to run for five minutes then reduce flow to slow, steady stream.
2. Fill each of the provided 1 Liter bottles to the neck (see figure to the right).
3. Replace the cap and securely fasten. Do not over tighten; this could result in a broken lid or bottle.
4. Vertically place barcode label on bottle. The barcode must match the Chain of Custody for each sampling site. If bar code is not provided, write sample site address, date, time collected, and sample point on the bottle.
5. Immediately place all bottles in provided cooler and fill with ice. Do not store samples in freezer as they may break.
6. Repeat steps 2 through 5 for each sample bottle.
7. Complete the Chain of Custody.
8. If necessary, proceed to next collection site if needed and repeat steps 1-7.
9. See back for “Sample Delivery” details.

SAMPLE REJECTION

Samples may be rejected (not analyzed) if any of the criteria below are met:

- forms are incomplete, illegible, or missing
- bottle is not labeled to match sampling point
- bottle is not on ice or at proper temperature of ≤ 4°C
- sample is frozen
- sample is not received within **48 hours** of collection
- sample is not received in the DEQ provided 1 Liter Amber Glass bottle
- damaged beyond usability
