

**2019 State of Oklahoma  
Public Water Supply Program  
Annual Compliance Report**

Water Quality Division  
Oklahoma Department of Environmental Quality  
June 30th, 2020

**State of Oklahoma**  
Public Water Supply Program  
Annual Compliance Report  
for Calendar Year 2019

**The Drinking Water Program: An Overview**

The EPA established the Public Water System Supervision (PWSS) Program under the authority of the 1974 Safe Drinking Water Act (SDWA). Under the SDWA and the 1986 Amendments, EPA sets national limits on contaminant levels in drinking water to ensure that the water is safe for human consumption. These limits are known as Maximum Contaminant Levels (MCLs) and Maximum Residual Disinfectant Levels (MRDLs). For some regulations, EPA establishes treatment techniques in lieu of an MCL to control unacceptable levels of contaminants in water. The Agency also regulates how often public water systems (PWSs) monitor their water for contaminants and report the monitoring results to the states or EPA. Generally, the larger the population served by a water system, the more frequent the monitoring and reporting (M/R) requirements. In addition, EPA requires PWSs to monitor for unregulated contaminants to provide data for future regulatory development. Finally, EPA requires PWSs to notify their consumers when they have violated these regulations. The 1996 Amendments to the SDWA require consumer notification to include a clear and understandable explanation of the nature of the violation, its potential adverse health effects; steps that the PWS is undertaking to correct the violation and the possibility of alternative water supplies during the violation.

The SDWA applies to the 50 states, the District of Columbia, Indian Lands, Puerto Rico, the Virgin Islands, American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, and the Republic of Palau.

The SDWA allows states and territories to seek EPA approval to administer their own PWSS Programs. The authority to run a PWSS Program is called primacy. For a state to receive primacy, EPA must determine that the state meets certain requirements laid out in the SDWA and the regulations, including the adoption of drinking water regulations that are at least as stringent as the Federal regulations and a demonstration that they can enforce the program requirements. Of the 56 states and territories, all but Wyoming and the District of Columbia have primacy. The EPA Regional Offices administer the PWSS Programs within these two jurisdictions. The Oklahoma Department of Environmental Quality (DEQ) is the primacy agency for the State of Oklahoma Drinking Water Program.

The 1986 SDWA Amendments gave Indian Tribes the right to apply for and receive primacy. EPA currently administers PWSS Programs on all Indian lands except the Navaho nation, which was granted primacy in late 2000.

**Annual State PWS Report**

Each quarter, primacy states submit data to the EPA Safe Drinking Water Information System (SDWIS/FED), an automated database maintained by EPA. The data submitted include, but are not limited to, PWS inventory information, the incidence of Maximum Contaminant Level, Maximum Residual Disinfectant Level, monitoring, and treatment technique violations; and information on enforcement activity related to these violations. Section 1414(c) (3) of the Safe Drinking Water Act requires states to provide EPA with an annual report of the violations in each of six categories: MCLs, MRDLs, treatment techniques, variances and exemptions, significant monitoring violations, and significant consumer notification violations. Violation and enforcement action data are stored in the SDWIS/FED database. The tables in this report are based largely on data retrieved from DEQ databases.

## **Maximum Contaminant Level**

Under the Safe Drinking Water Act (SDWA), the EPA sets national limits on contaminant levels in drinking water to ensure that the water is safe for human consumption. These limits are known as Maximum Contaminant Levels (MCLs).

## **Maximum Residual Disinfectant Levels**

The EPA sets national limits on residual disinfectant levels in drinking water to reduce the risk of exposure to disinfectant byproducts formed, when PWSs add chemical disinfectant for either primary or residual treatment. These are known as Maximum Residual Disinfectant Levels (MRDLs).

## **Treatment Techniques**

For some regulations, the EPA establishes treatment techniques (TTs) in lieu of an MCL to control unacceptable levels of certain contaminants. For example, treatment techniques have been established for viruses, some bacteria, and turbidity.

## **Variances and Exemptions**

A primacy state can grant a PWS a variance from a primary drinking water regulation if the characteristics of the raw water sources reasonably available to the PWS do not allow the system to meet the MCL. To obtain a variance, the system must agree to install the best available technology, treatment techniques, or other means of limiting drinking water contamination that the Administrator finds are available (taking costs into account), and the state must find that the variance will not result in an unreasonable risk to public health. At the time the variance is granted, the state must prescribe a schedule (including increments of progress) the PWS will follow to come into eventual compliance with the MCL. Small systems (those serving 3,300 or fewer persons; or 10,000 or fewer persons with the Administrator's approval) may also be granted variances if they cannot afford (as determined by application of the Administrator's affordability criteria) to comply with certain MCLs (non-microbial, promulgated after January 1, 1986) by means of treatment, alternative source of water, or restructuring or consolidation. Small systems will be allowed three (3) years to install and operate EPA approved small system variance technology. The variance shall be reviewed not less than every five (5) years to determine if the system remains eligible for the variance.

A primacy state can grant an exemption temporarily relieving a PWS of its obligation to comply with an MCL, treatment technique, or both if the system's noncompliance results from compelling factors (which may include economic factors) and the system was in operation on the effective date of the MCL or treatment technique requirement. A new PWS that was not in operation on the effective date of the MCL or treatment technique requirement by that date may be granted an exemption only if no reasonable alternative source of drinking water is available to the new system. Neither an old or a new PWS is eligible for an exemption if management or restructuring changes can reasonably be made that will result in compliance with the SDWA or improvement of water quality, or if the exemption will result in an unreasonable risk to public health. The state will require the PWS to comply with the MCL or treatment technique as expeditiously as practicable, but not later than 3 years after the otherwise applicable compliance date.

## **Monitoring**

A PWS is required to monitor and verify that the levels of contaminants present in the water do not exceed the MCL. If a PWS fails to have its water tested as required or fails to report test results correctly to the primacy agent, a monitoring violation occurs.

### **Significant Monitoring Violations**

For this report, significant monitoring violations are generally defined as any major monitoring violation that occurred during the calendar year of the report. A major monitoring violation, with rare exceptions, occurs when no samples were taken or no results were reported during a compliance period.

### **Consumer Notification**

Every Community Water System is required to deliver to its customers a brief annual water quality report. This report is to include some educational material, and will provide information on the source water, the levels of any detected contaminants, and compliance with drinking water regulations.

### **Significant Consumer Notification Violations**

For this report, a significant public notification violation occurred if a community water system completely failed to provide its customers the required annual water quality report.

## **Public Water Supply Inventory – Calendar Year 2019**

The SDWA defines a Public Water Supply system (PWS) as a system that provides water via piping or other constructed conveyances for human consumption to at least 15 service connections or serves an average of at least 25 people for at least 60 days each year. There are three types of PWSs. PWSs can be community (such as towns and rural water districts), non-transient non-community (such as schools or factories), or transient non-community systems (such as rest stops or parks). For this report, the acronym “PWS” means systems of all types unless specified in greater detail.

The Oklahoma Department of Environmental Quality also recognizes smaller systems as public water supplies. These public water supplies are referred to as minor or non-public water systems. Violations and enforcement actions for minor public water supply systems are not reported to SDWIS and are not included in this report.

The number of Community, Non-Transient Non-Community, and Non-Community water systems and the population served by each is given in the following table. The average number of individuals that consume water from each system each day is used to calculate the number of residents served by a public water supply. Because some systems are restaurants, tourist attractions, etc., individuals may be counted more than once due to where they patronize or work. Out-of-state individuals that visit or do business in the state are also counted.

<b>Table A: Public Water Supply Systems by Type</b>	<b>Number of Systems</b>	<b>Population</b>
Community Systems (C)	904	3,676,215
Non-Transient Non-Community Systems (NTNC)	78	19,705
Non-Community Systems (NC)	375	29,875
<b>Total PWS systems meeting Federal Definition</b>	<b>1,357</b>	<b>3,725,795</b>

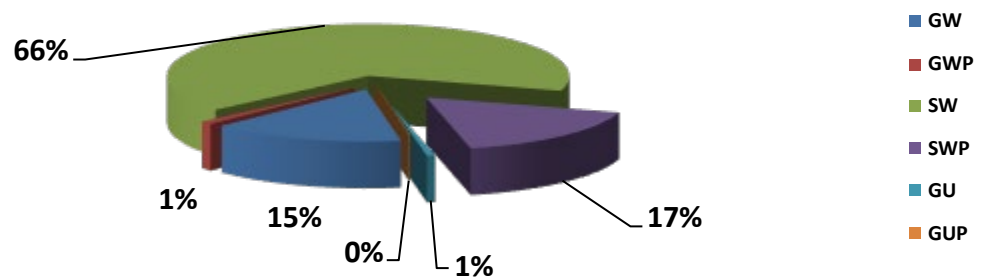

Public water supply systems may receive their water from groundwater wells, surface water impoundments or reservoirs, or purchase water from other systems for their primary source of drinking water or for supplemental supply. The number of groundwater, surface water, and purchase systems and the population served by each type is given in the table below. Eighty-one percent (81%) of the population is served by surface water or purchased from surface water systems.

<b>Table B: Public Water Supply Systems by Source</b>	<b>Number of Systems</b>	<b>Population</b>
Public Water Supplies using Surface Water as their Primary Source (SW)	183	2,458,437
Public Water Supplies using Groundwater as their Primary Source (GW)	735	575,839
Public Water Supplies using Groundwater under the Influence of Surface Water as their Primary Source (GU)	8	24,839
Public Water Supplies purchasing from Surface Water systems (SWP)	345	627,020
Public Water Supplies purchasing from Groundwater systems (GWP)	78	36398
Public Water Supplies purchasing from Groundwater under the Influence of Surface Water systems (GUP)	8	3262
	<b>1,357</b>	<b>3,725,795</b>

**Percent of PWS by Source**

**Percentage of Population by Source Type**

There are two thousand five hundred and ninety-six (2,596) water wells currently being operated by PWSs in the state of Oklahoma. The number of wells operated by community, non-transient non-community, and non-community water systems are given in the table below.

<b>Table C: Number of Wells operated by Public Water Supply Systems</b>	
Community system's wells	2,058
Non-Transient Non-Community system's (NTNC) wells	144
Non-Community system's (NC) wells	393
<b>Total Number of PWS wells</b>	<b>2,595</b>

**Percent of Wells by PWS Type**

## Public Water Supply Violations and Enforcement – Calendar year 2019

The number of MCL/MRDL violations, action level exceedances, treatment technique violations, and monitoring violations for each contaminant regulated for the compliance interval January 1, 2019, to December 31, 2019 is given in the following table.

Chemical Contaminant	MCLs		Treatment Technique		Significant Monitoring/Reporting	
	Number of Violations	Number of Systems with Violations	Number of Violations	Number of Systems with Violations	Number of Violations	Number of Systems with Violations
<b>Phase II/V</b>						
Arsenic MCL Violations	22	6				
Arsenic Monitoring Violations					0	0
IOC MCL Violations	4	2				
IOC Monitoring Violations					4	2
Nitrate & Nitrite as (N) MCL	57	26				
Nitrate Monitoring Violations					83	69
SOC MCL Violations	0	0				
SOC Monitoring Violations					390	24
VOC MCL Violations	0	0				
VOC Monitoring Violations					541	12
<b>Radionuclide</b>						
MCL Violations	14	2				
Monitoring Violations					104	7
<b>DBPR Rule</b>						
DBP MCL & MRDL	966	161				
Treatment Technique (TOC's)			33	16		
Monitoring Violations					405	159
<b>Total Coliform Rule (RTCR)</b>						
Acute MCL Violations	7	7				
TCR Monitoring Violations					583	259
<b>Lead &amp; Copper Rule</b>						
Treatment Technique			0	0		
Monitoring Violations					55	40
<b>Ground Water Rule</b>						
Treatment Technique			0	0		
Monitoring Violations					28	26
<b>Surface Water Rules</b>						
Treatment Technique			68	22		
Monitoring Violations					86	20
<b>Consumer Confidence Report</b>						
Failure to complete, distribute or submit					0	0
<b>Public Notification</b>						
Failure to notify					34	5
<b><i>SUBTOTALS</i></b>	<b>1,070</b>	<b>204</b>	<b>101</b>	<b>38</b>	<b>2,313</b>	<b>597</b>
<b>GRAND TOTAL OF VIOLATIONS = 3,484</b>						
<b>ACTUAL TOTAL NUMBER OF PUBLIC WATER SYSTEMS WITH MCL VIOLATIONS =215</b>						
<b>ACTUAL TOTAL COUNT OF PUBLIC WATER SYSTEMS IN VIOLATION FOR MCL, TREATMENT TECHNIQUE AND MONITORING/REPORTING ACROSS ALL RULES = 588</b>						

## Comments and Remarks

The State of Oklahoma's Public Water Supply Program currently oversees one thousand three hundred and fifty-seven (1,357) public water supplies (PWS) that meet the federal definition of a PWS. The grand total number of violations for the calendar year of 2019 was three thousand four hundred and eighty-four (3,484). Some public water systems may be counted more than once if they incurred multiple violations. The actual total number of public water systems in violation for MCL was two hundred and fifteen (215). Of the one thousand three hundred and fifty-seven (1,357) systems, one thousand one hundred and forty-two (1,142) or eighty-four percent (84%) of these systems reported no maximum contaminant level (MCL) violations. Five hundred and eighty-eight (588) systems or forty-three percent (43%) of the one thousand three hundred and fifty-seven (1,357) PWS's incurred a violation at some point during the calendar year of 2019.

Six (6) systems had twenty-two (22) violations for exceeding the MCL for arsenic. Zero (0) systems had violations for arsenic monitoring. Two (2) systems had four (4) violations for exceeding the MCL of the Inorganic Chemical Contaminant (IOC) group. Two (2) systems had four (4) violations for IOC group monitoring. Twenty-six (26) systems had fifty-seven (57) violations for exceeding the nitrate MCL standard in at least one of their wells during the calendar year of 2019. Sixty-nine (69) systems had eighty-three (83) nitrate monitoring violations. No systems had Synthetic Organic Contaminant (SOC) group MCL violations. Twenty-four (24) systems had three hundred and ninety (390) SOC monitoring contaminant group violations. No systems had Volatile Organic Chemical Contaminant (VOC) group MCL violations. Twelve (12) systems had five hundred and forty-one (541) VOC contaminant group monitoring violations.

Two (2) systems had fourteen (14) Radionuclide MCL violations in the calendar year 2019. Seven (7) systems had one hundred and four (104) violations for Radionuclides monitoring. One hundred and sixty-one (161) systems had nine hundred and sixty-six (966) violations of the Disinfection Byproducts Rule (DBPR) MCL. Sixteen (16) systems had thirty-three (33) violations of the DBPR Treatment Technique requirement. One hundred and fifty-nine (159) systems had four hundred and five (405) monitoring violations for the DBPR.

Seven (7) systems had seven (7) Revised Total Coliform Rule (RTCR) Acute MCL violations, meaning seven (7) mandatory Boil Orders were issued for these PWSs that tested positive for fecal coliform or E-coli. Two hundred and fifty-nine (259) systems had five hundred and eighty-three (583) monitoring violations for the RTCR. Zero (0) systems had a treatment technique violation for the Lead and Copper Rule. Forty (40) systems had fifty-five (55) monitoring violations for the Lead and Copper Rule. No systems had any Ground Water Rule (GWR) Treatment Technique violations. Twenty-six (26) systems had twenty-eight (28) monitoring violations for the GWR.

All surface water PWSs in Oklahoma are required to provide filtration. Twenty-two (22) systems had sixty-eight (68) Surface Water Rule (SWR) treatment technique violations. Twenty (20) systems had eighty-six (86) SWR monitoring violations. DEQ has not yet determined Consumer Confidence Report (CCR) violations for 2019. Five (5) systems had thirty-four (34) violations for failure to do Public Notification (PN).

<b><u>Type of Enforcement Actions</u></b>	<b><u>Number of Enforcement Actions Issued</u></b>
Informal Enforcement Letters	2,141
Notices of Violation/Consent Orders	262
Administrative Compliance Orders	1
Boil Orders	13
<b><u>Total Number of Enforcement Actions</u></b>	<b><u>2,417</u></b>
<b>Return to Compliance</b>	<b>1,087</b>

The Oklahoma Department of Environmental Quality issued two thousand four hundred and seventeen (2,417) enforcement actions in response to the violations listed in this report. These enforcement actions consisted of two thousand one hundred and forty-one (2,141) informal enforcement letters. Two hundred and sixty-two (262) Notices of Violation (NOVs)/Consent Orders (COs), one (1) Administrative Compliance Order (ACO), and thirteen (13) Boil Orders were administered. One thousand and eighty-seven (1,087) systems were returned to compliance during the calendar year of 2019.

An informal enforcement document is the first document issued to facilities when they fail to monitor. A Notice of Violation is the first formal enforcement document issued to facilities when they exceed maximum allowable levels or fail to meet Department of Environmental Quality rules and regulations concerning matters such as construction deficiencies or operating procedures. A Consent Order is typically the next order issued. The Consent Order is an order that contains an agreement between the water system and the DEQ and details the tasks and deadlines for correcting the cited violation. An Administrative Compliance Order is an order that is issued when time is limited, and there is a significant health hazard, or the water system refuses to agree to the Consent Order. Both the Consent Order and the Administrative Compliance Order have stipulated penalties for failing to meet the required deadlines. Boil Orders are issued to systems that have “acute” or “fecal positive” bacteriological violations. Boil Orders can also be issued for exceedance of turbidity standards, insufficient chlorine residuals, and low pressure. Boil Orders require immediate notice to all consumers in order inform the public of how to make their water safe for human consumption.
